Volume VIII

April 1990

Number #seventy-five

Villager Tower

Sixth Street Improvements

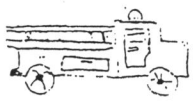

City Engineer reported on attendance at the Lower Minnesota River Watershed meeting where request was made for financial assistance for the proposed Sixth Street Improvement project. Funding looks favorable. Mueller's Gravel Representatives met with staff offering assistance. Mueller's is working on a bypass from their pit.

Some problems have been encountered in planning the street. Variations for placement of the street were discussed. The street does not lie where it was platted. Some parts are on private property. Engineer was directed to return to the next meeting with alternative street placement. Engineer would like to prepare plans and specifications along with mailers due to the time frame forconstruction which needs to be started as soon as possible.

Citizen was asked about drainage problems on his property. Curb would alleviate most of the problems it was stated. The lower portion of the street was not the problem, rather the upper two thirds were. Suggestion was made to do work in segments as this option was offered in Feasibility Study. Engineer requested authority to prepare plans and specifications. Motion was made and carried authorizing preparation of these plans and specifications.

Fire Truck

Riesgraf reported that the new fire truck would be completed by August 20th. Financing and bonds were discussed. Accurate interest rate from Ms Drude was requested. More detailed information on financing was requested for May meeting.

Fire Department

Administrator reported discussions regarding conformance of fire Department by -laws. Fire Chief discussed attendance with firemen. Though some are not at drills and meetings, they are helping at fundraisers, etc.

Mayor Meyers stated that members of the Fire Relief Association who are not in good standing may be a detriment to the relief fund in complying with state law. Riesgraf's opinion was that until replacements are available, no one will leave the department.

Country View Heights

On April 2nd motion was made and carried adopting resolution requesting Feasibility Study completion for CountyView Heights subdivision for streets, drainage and water improvements.

D. N. R.

Contact was made to the city regarding railroad property's use if abandoned. Representatives from the DNR and other interested individuals will attend the May meeting to discuss light rail and other proposals.

Citizen inquired about planting wild flowers along Co Rd #40 in the right-of-way.Arborateum has been contacted regarding possible funding through state offices. Suggestion was made to draft resolution to endorse idea.

Easement

Citizen was present to discuss driveway placement.City attorney had suggested responsibility to be identified and an easement granted for portions of the driveway on the city right-of-way. It was still necessary to identify where city right-of-way was. Suggestion was made to contact previous owner.

Village Hall

State Fire Inspector inspected the Village Hall requiring some additional changes, including another basement exit. Questions were raised regarding authority to require these changes. Issue was tabled.

Special Note

Local Boy Scouts from Chaska Troop #174 will be planting bushes and shrubs at the Village Hall this month.

Municipal Utilities

Water/Sewer operator reported that the well check valve is leaking. Changes were made in municipal utilitites rates resolution and council consensus was to approve presented wording.

Proposed Street/Alley Vacations (calig/Cheryl)

Administrator showed the council the map of proposed street/alley vacations, in order to clear up areas that have had pieces vacated at different times, as well as platted streets and alleys which will not be necessary in the future. Suggestion was made to have the map available at the Town Meeting. Two Public Hearings would be necessary.

Special Note

Please make note of streets/alley vacations that will be taking place at the City council meetings with public hearings to be held. The map will be available at the Town Meeting on May 15th. Any additional questions, contact City Hall. If you are unsure of which streets or alleys are being considered or if your street is included, please be sure to attend the Town Meeting and look at the map which will be available.

Park and Recreation Board

Members are needed for this board. If you are interested contact your councilmen or City Hall. You want, have opinions, now is your chance to do something about your concerns. Contact the city personnel.

Memorial Day

LOOKIN' GOOD!

Editor's Column

arver County residents -

irst of all, do you really need to collect your grass clippings? any people, myself included, get by nicely by simply letting them ie on the lawn and decompose naturally back into the soil. If you do eel the need to collect them, compost them on your own property or se them for mulch in your garden. Here's where things start to get ompli cated.

wo options will remain for residents who wish to continue to dispense f their grass clippings somewhere other than their own property. One, ity compost sites will continue to accept grass clippings from residents. his means you can still load the bags into your car, drive to the nearest ite, UNBAG the clippings, and leave them to be composted... Two, you an contract with your garbage hauler for separate collection of your lippings. This means your hauler will separately collect clippings and aul it to a privately operated compost site. I would expect that this ervice will cost you extra on your garbage bill.

or those of you who wish to continue to bag your grass, I would urge ou to contact your hauler, City Hall or the Carver County Environmen= al Services/Carver County Courthouse to learn more about the options pen to you."

Those who wish to continue to bag their grass clippings and have them "disappear" from the curb with the rest of their garbage.

On January 1st of this year a new law went into effect that bans the disposal of yard waste (leaves, grass, prunings, etc) in Metro Area landfills or incinerators. That means that your garbage hauler can no longer mix leaves and grass with household garbage if he wishes to empty his truck at solid waste disposal facility in the Metro area. The yard waste must either be hauled out of our county (something we certainly want to discourage) if it is mixed with garbage or composted separately at home or an approved site.

The county and various cities are making sites available to haulers and residents alike for the yard waste generated from spring and fall clean up. We have found that composting large amounts of grass generates unpleasant odors...

Collection Compost Service

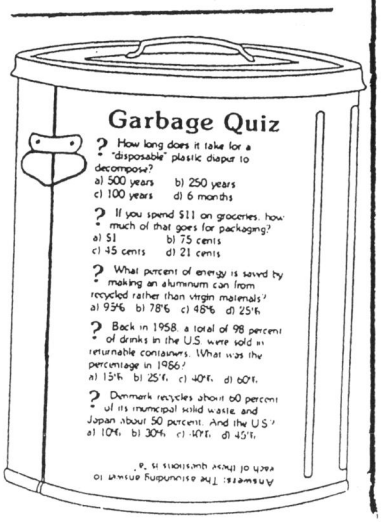

As of January 1st, 1990 yard waste, such as leaves, grass clippings, garden waste or branches are not allowed in with the regular garbage.

Take this material to your local compost site, UNBAG material and dump. Any questions, contact your local governmental units or sanitation collector.

Thanks for your cooperation.
