Volume VIII

December 1990

Number #Eighty-Three

Villager Tower

Council Vacancy

Elected to office to fill vacancy of resignation by former councilman, Robert Lowe took the Oath of office on December third.

Scott-Carver Co-operative Center

Council was told of need for use of gym for students during winter months. There would be supervision by staff members. Clarification was reached that the center would be responsible for all damages. Motion was made and carried approving lease agreement with Carver-Scott Educational Center.

Assessment Policy

Public Hearings to be scheduled are too soon for Assessment Policy. Administrator explained attorney's draft for council consideration.

It was determined that closer review was necessary. Motion was made and carried tabling assessment policy until February 1991, and holding a work session prior to that date.

Budget

Public Hearing was opened on the Abandoned Vehicle Ordinance. Frey commented that it was his opinion that the use of a fence to screen vehicles from public view was not acceptable and a limit on number of stored vehicles should be imposed. Citizen stated the ordinance was unclear regarding collector vehicles and number permitted. Intrepretation of the ordinance was taken as to include collectable cars which would mean elimination of them, as well as the junk cars. Councilman attempted explaining intent of council. Motion was made and carried tabling ordinance until January. Council would review Minnesota State Statue quoted in the ordinance and have it available.

Insurance

American Appraisal Association completed their appraisal of the Village Hall. Appraisal reached was at 455,000. Recommendation was given to insure the building for at least 80% of the appraisal which would be an additional $1,500 premium per year. Motion was made and carried insuring Village Hall at 80% of appraisal value.

Administrator authorized issuance of an insurance policy covering volunteers working on city projects. The water filtration plant is one such project and an official Lions project.

Therefore, Lions are covered who are working on this project. The premium is less than $500 per year. The mayor's opinion was that this was long overdue and a good idea.

Motion was made and carried to increase the Insurance Line Item in the 1991 Budget by $2,835.

Citizens inquired about who appraised the Village Hall. Comment was made appraisal given was too high. Question was raised about another appraisal being done and if second appraisal were less, would it reduce premium. Appraisal was a special offer done on the Village Hall.

Recycling

Public Hearing on the recycling ordinance was opened. Administrator explained the ordinance which had been written by the attorney. Carver County has provided the bins. Once distributed, these bins become property owners' responsibility.

One section of ordinance was interpreted of putting city in the position of monitoring these containers. Councilman Thuening stated that the city should wait and see what the county would do about recycling. Motion was made and carried tabling recycling ordinance until more input is received from the county concerning their program.

Vacancies

The City of Carver is seeking volunteers to fill existing vacancies on the Planning Commission, Parks and Recreation Board and Heritage Preservation Commission. There is one vacancy for each Committee.

Interested persons are asked to contact the City of Carver by writing to P.O. Box 147, Carver, MN 55315 or calling 448-5353.

Winter Youth Night

The City of Carver Parks and Recreation Board will hold a weekly Youth Activity night at the Village Hall during the months of January, February and March. The Youth Night will be for children eight years old to fifteen years old and will be from 7:00 PM 8:30 PM on Friday nights, except March 15th, Lioness Bullhead Feed.

The activities will be held in the gym and will include volleyball or basketball. Suggestions will be appreciated and considered at Parks and Recreation Board meetings which are held the second Monday of each month.

Parks and Recreation Board Members will supervise the activities and would appreciate any volunteer help offered.

This program will be on a trial basis and its continuation will depend on attendance and the availability of volunteers to supervise the activities.

If you are interested in having your children attend these Winter Youth Nights, please obtain a form from the City of Carver (448-5353).

Lift Station

New homeowners were present to discuss a lift station for their new home. Municipal Utilities operator opposed lift station installation. His opinion was that this lift station should match owners installed. It is his opinion that this lift station is not adequate and is inferior; furthermore, he would not maintain it on his present contract.

Administrator reviewed possibility of owner's maintaining the lift station. However, it was the attorney's and administrator's opinion that the homeowners could not be exempted from the city system or maintain their own system. Ordinance does not contain stipulations. Mayor stated that specifications needed to be upgraded after original lift stations were installed.

Homeowners lift station pumps into the gravity system on Elm Street. Concern was expressed because the system does not have check value and horse power difference. Concern regarding monitor panel was also discussed.

Administrator suggested resolution stating acceptance of lift station, municipal operator maintaining but homeowners are responsible when and if component fails, and replacement is to be to specifications. Municipal operator also has problems with access. City Engineer said lift station could be modified, however this solution could be just as expensive as replacement. Operator remained adamant that the system have a check valve.

Mayor was in agreement that the system be upgraded to city specifications. Homeowners inquired about on-site systems versus city utilities. That this idea was not feasible was the response.

Discussion continued to find solutions. Mayor questioned upgrade and assessment. Homeowners preference was maintenance of their own system. Since lift station has not been utilitized councilmember stated his opinion that system should be returned for a refund. He favored upgrade and assessment, although another alternative required replacement parts since present parts are not interchangeable with city's lift stations.

Replacement interfered with moving into new residence. Consensus of the council was that if lift station could not be returned, the city would purchase it or possibly the contractor would locate someone to purchase. Property could be assessed if owners waived their 429 Rights to a public hearing. Motion was made and carried that lift station be upgraded to design standard of the city. Motion was made and carried allowing owners to move, using septic tank as a holding tank. Motion was made and carried directing staff to aid homeowners in upgrading system.

Miscellaneous

Mayor requested scheduling a special date, in order for the council elected members to be included in on discussion. Motion was made and carried tabling the scheduling of a meeting date until the January 1991 meeting.

Motion was made and carried authorizing staff to sell old copy machine at highest offer.

Motion was made and carried accepting Mark's Sanitation bid collecting city's refuse.

Motion was made and carried to have council meet with the Heritage Preservation Commission in January in order to meet with new councilmembers.

Administrator explained the Systems Statement prepared for the Metropolitan Council informing the City of non-compliance. Motion was made and carried to forward the Systems Statement and a letter to the Metropolitan Council.

Motion was made and carried reappointing Sandee Haerden, Robert Riesgraf and Jeff Feltmann to the Parks and Recreation Board.

Councilman Low resigned as the Fire Department's Equipment Maintenance Engineer as of December 31, 1990.

Administrator informed the Council that Reuters is still interested in putting a plant on the Industrial Property in Carver.

Municipal Utilities

Report was given on the Water Filtration Project. Cement slab has been installed at Lion's Park and most of Chaska's building has been demolished. An approved sludge site is not available yet.

Question was asked if a building permit is required for the Filtration Plant. The building size is expected to be approximately 32 feet by 48 feet. The generator will be housed at the plant. Motion was made and carried authorizing the building inspector to inspect the foundation and footings, as well as start processing building permit. Engineer requested specifications be maintained since the Department of Health will require this information.

Fire Relief Association

Fireman was present concerning discrepancy on city records regarding service years. Correct information will be forwarded to the mayor.

Motion was made and denied to raise Fire Relief from $400 per year of service to $450 per year.

Requests for Bids

The City of Carver has a used Sharp SF756 Desk Top Copier for sale. The Copier was purchased new in December, 1984. It is a dry, electrostatic transfer method copier, maximum copy size is power source of 120V +/- 10%, 60 Hz. The machine at this time is close to needing regular maintenance. The average cost for this maintenance is $150 per 8,000 copies and includes the toner, master and developer.

The City will take bids until January 4, 1990 at 3:30 p.m. at the City Hall, 316 Broadway, P.O. Box 147, Carver, MN 55315. The copier may be viewed at the above address during office hours from

8:30 AM to 3:30 PM on December 16 through 20, 27, 28, January 2nd through the 7th. (Phone 448-5353).

Wearable Art

Cross-Stitch and Knitting Classes To Start in January

The following two classes will be held at the Wearable Art shop in the Needleworks of Carver Town Building.

A two-class course in beginning counted cross-stitch will be taught in January by Mary Ann Oldenburg. Participants may choose to attend either two Thursday evenings (January 10 and 17, 7-9 PM) or two Sunday afternoons (january 13 and 20, 2-4 PM).

Kits will be provided; each kit permits the user to choose one of three designs. Instruction is free to purchasers of the kit, which costs $9.95. Mary Ann recommends you bring your own scissors.

Class size is limited to seven persons per session. Although preregistration is not required, Mary Ann would appreciate a phone call indicating which session you plan to attend: 448-4001 or 448-6285.

A knitting class for intermediate-level knitters will be taught by Barb Farrell. The six-week class will feature kniting a sweater with a three-color yoke. An Elizabeth Zimmerman video will be used selectively to illustrate certain features.

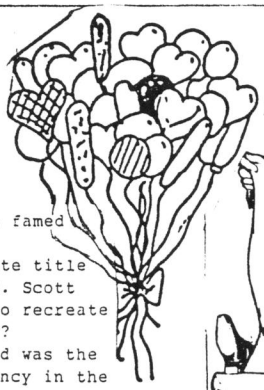

Participants may choose to come either once or twice a week, but should keep in mind that the first week (determining size and stitch gauge) and the last two weeks (working the three-color yoke) will be most important.

Therefore, if you need to be gone for a class or two, try to arrange your schedule accordingly. The class will begin on Thursday, January 10, 10:00 AM to 12 Noon, or Sunday, January 13, 2-4 PM.

The class is free to those who purchase the yarn (machine washable/dryable wool) and pattern from Wearable Art. Cost will depend on sweater size. Call Wearable Art, 448-6285 evening/weekends, or Barb, 448-9453 days/weekends) for an estimate or to register.

Trivia Questions

1) What's Moscow's most famed opera house?
2) What's the appropriate title of the 1978 George C. Scott film that attempts to recreate a 1930's double bill?

Villager Tower

I would like to take this opportunity to thank all you wonderful people who dropped that "Wanted: Loose Change" into the jars distributed throughout town. As readers and as your editor, I would like to extend my deepest gratitude to you all and you know who you are. Please keep it up, because it helps.

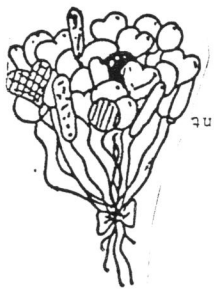

The total collected in the jars was $ 15.75 and $ 10.00 given to the store proprietor. Thank-you, thank-you so very much.

Disclaimer

The preliminary unapproved minutes from the City of Carver's council meetings were referenced to compose the Villager Tower.

Happy Birthday Patty
