Volume XI

January/February 1993

Number # One hundred eight

Villager Tower

Oath of Office

Mayor Elect Thomas Griep was sworn into office on January 4th by City Clerk. Council members Monroe and Low then took the Oath of Office from Mayor Griep.

Organizational Resolutions

At that meeting, they also discussed which members would fill the positions listed in the resolutions. Motion was made and carried by roll call vote to adopt resolution appointing members filling positions.

Carver Fire Department

The Carver Fire Department elected Jerry Dauwalter Chief of the Fire Department at their January 3rd meting.

1994 Township Fire Agreements

The council discussed fire rates for Dahlgren and San Francisco Townships for 1994. The rate for 1993 had been set at $ 67.50 per unit. Dahlgren Board members were present at the meeting. Fire Chief relayed that it was estimated that it could take four or five minutes longer to reach township units than it would to reach a city unit. Motion was made and carried to increase 1994 fire rate to $ 71.50 per unit for townships.

Joint Powers Agreement

Council reviewed the explanation from the Administrator for method of collecting for the services by Carver County. Motion was made and carried approving the Joint Powers Agreement Prosecution Contract with Carver County.

Public Works Report

Council discussed burn site at Riverside Park. This site must be discontinued and cleaned dup since it is in the flood plain. The gate to the area has not been closed recently due to snowmobilers. Suggestion was made to put up a "No Dumping" sign at gate.

Suggestion was presented to designate a day once or twice per year for brush dumping, but area should be fenced and have a gate.

Frey requested drafting an ordinance pertaining to the height of branches over public right-of-way on sidewalks and streets. Several trees hinder walking and snowplowing.

He also gave a report on the new lights put in the gym which are energy efficient. A rebate is possible from NSP on the cost of the fixtures. Presently, he is checking on other buildings to see if a rebate could also be received saving the city money on utility bills.

Municipal Utilities

Discussion was held on the proposed 1993 Operator Contract. There is an increase request in the contracted amount. Estimated time spent on municipal utilities was approximately thirty hours per week. The language of the contract is the same as the 1992 contract, except for the increase request. Council member stated that an alarm system should be included in the contract. One council member stated opinion that the increase was too high. More tests will be necessary in the upcoming year. Motion was made and carried to accept Wayne Dauwalter Plumbing Contract as amended by adding sewer lift station alarm system. Discussion was held regarding opinion that increase was too high. Another council member stated that since additional work would be required in 1993 with water sampling testing that the hourly rate was reasonable.

Operator reported that the roof is on the water treatment plant and gas will be hooked up soon. Another door needs to be ordered and all other doors need to be put on to secure it and heat it. Question was asked about the Administrator helping with plans. Request was made to have plans for the filtration plant approved before further construction. The overhead door should be purchased and installed so the building can be closed up.

Miscellaneous

Council member asked if Fire Department claims could be broken down separately on the list of claims or a separate column be added for Fire Department claims.

Clerk distributed copies of the first part of the Code of Ordinances for council review so the recodification process could be pursued. Sections of Code will be reviewed.

Report was given that the United States Environmental Protection Agency has notified the city that the 1987 Sewer Grants are being closed out without an in-house audit.

Frey reported that the Muellers met with him and the administrator about erosion on the road to the old Catholic Cemetery. Suggestion was made to place a pipe to contain water which runs down hill as he feels that the force of the runoff could be great enough to cause erosion further down the hill.

The Carver Story

Due to popular demand, the local history book, *"The Carver Story"* will be reissued by the Carver Lions Club. In this edition, pictures will be added. We are looking for suitable historical pictures to add to those we already have. In particular pictures of Trinity Lutheran Church before its addition, Salem Swedish Lutheran Church before it was made into a dwelling, the Neunsinger hotel which used to stand on the corner now occupied by the city hall, and the old Johnson Brothers' store are desired. Pictures of early settlers in Carver would also be welcome. If you have a picture you would be willing to lend, call Lucie Hartley or Douglas Bade. Be sure to have your name on the back, so we can return them to their owners.

By: Lucie Hartley

City Flag

Mayor Griep said that the Planning Commision stated that the city needs a flag and that a contest should be held to get public input. He further stated that the Chaska Administrator volunteered to meet with the council and Carver Administrator to develop a mission statement for Carver.

Teamwork

In the fall, when you see geese in a "V" formation heading back south for the winter, you might be interested to know why they fly that way. Scientists have learned that as each bird flaps its wings, it creates an uplift for the bird immediately following. By flying in "V" formation, the whole flock adds at least 71 percent more flying range than if each bird were on its own.

Basic Truth # 1: Those who share a common direction and sense of community can get where they're going more quickly and easily because they travel on the thrust of one another's efforts.

Whenever a goose falls out of formation, it suddenly feels drag and air resistance from trying to go it alone. It quickly gets back into formation to take advantage of the lifting power of the bird immediately in front.

Basic Truth # 2: If we have as much sense as a goose, we will stay in formation with those who are headed the same way we are.

When the lead goose gets tired, it rotates back in the wing and another flies point.

Basic Truth # 3: It pays to take turns on hard jobs - for people as well as for southbound geese.

The geese honk from behind to encourage those up front to keep their speed.

Basic Truth # 4: We need to be careful of what we say when we honk from behind.

Finally, when a goose gets sick or is wounded by gunshot and falls out, two geese fall out of formation and follow it down to provide help and protection. They stay with it until it is either able to fly or is dead, then set out to catch up with their flock, flying on their own or with another group.

Final Truth: If we have the sense of a goose, we'll always stand by one another.

Daddy

Walk a little plainer, Daddy,
Said a little boy so frail,
I'm folowing in your footseteps,
And I don't want to fail.

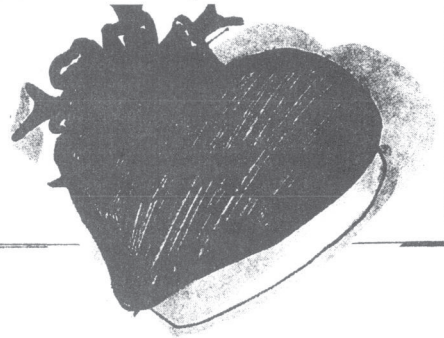

Somtimes your steps are very plain,
Sometimes they are hard to see,
So walk a little plainer, Daddy
For you are leading me.

I know that once you walked
This way, many years ago.
And what you did along the way,
I'd really like to know.

For sometimes I am tempted,
I don't know what to do.
So walk a little plainer, Daddy,
For I must follow you.

Someday when I'm grown up,
You are like I want to be.
Then I will have a little boy
Who will want to follow me.

And I would want to lead him
right,
And help him to be true.
So walk a little plainer, Daddy,
For we must follow you.

Carver Fire Department Highlights and Community Calendar

February

February 1st	-	Council Meeting 6:30 PM
February 3rd	-	Lions
February 4th	-	Drill Night 6:30 PM
