Volume XII

~~Volume XII~~

October/November 1994

Number #one hundred twenty-eight

Village Tower

Public Works

Councilman Low asked at the October 3rd meeting why Fourth Street had not been planned for paving as part of the '94 Improvement Project. Engineer stated that Fourth Street was not part of the project. Frey stated that street should be blacktopped even though sewer has not been installed in the area. If sewer is installed in the future, it can be installed in the ditch.

Frey also obtained information for paving Mr Hope Rd.

Estimates were gotten for pumps to control water run off during heavy rains. Two pumps would cost $25,000. Discussion was held reviewing FEMA (Federal Emergency Management Agency) and funds that are still available to the city. However, these funds would not cover new pumps. Restoration claims can be submitted until 12/26/94, plus the city can request an extension. Council discussed options for funding purchase of needed pumps. Clerk was directed to research issue. Motion was made and carried to purchase pumps.

Miscellaneous

Black Sox requested approval of a 3.2 license for the Black Sox fundraiser on October 22nd. Motion was made and carried approving license for Black Sox contingent on the Lions sponsoring them.

Motion was made and carried by roll call vote with all ayes adopting resolution approving '95 Policing Contract with Carver County.

Clarification was questioned about payment for hook-up fees in new development areas. Council stated that anyone hooking to the system would pay the fee.

Motion was made and carried with all ayes adopting resolution appointing election judges for November 8th General Election.

Council member commented on the need to close the gate again to RiverSide Park due to vandalism.

Varience Request

Council reviewed recommendations of the Planning Commission reviewing variance request for a garage. Owner requested variance in order to preserve a mature Oak tree on property. Motion was made and carried by roll call vote with all ayes granting variance.

Bus Garage Usage

Garage owner discussed bus garage usage with the council. An individual is interested in renting some land for semi-trailers. The need to park trailers on site may not occur, however sales lot is necessary to meet state requirements for this type of business. Retirement plans coincide with potential purchase for property. Planning Commission was of the impression that bus garage was operating as a non-conforming use and a Conditional Use Permit would be necessary for proposed use.

1994 Improvements

Business owner inquired about Sixth Street closure since buses were unable to get out in AM hours. Vehicle was stuck on Sixth Street, both to the east and west of bus garage. Engineer was also to talk with contractor about liability of damage for a mirror which struck a truck that was stuck on closed street.

Engineer reported that water main on Fourth Street is complete except for testing and flushing of lines. Sewer work is also done on the upper portion of Sixth Street and Sunny Side Addition. Council member inquired about running water lines from Fourth Street to Carver Bluffs. Engineer stated that this process has started.

Carver Lions

Carver Lions sponsored the Halloween party.

Volunteers are needed for every Saturday in November to work on their latest major project which has already been stated. This project involves the remodeling of the downstairs of the Village Hall. All are welcome to come and help.

Lions are still talking and working on ballfield complex. The next major project to undertake at fields is the dug outs.

Lions held their Annual Zone Meeting. Meeting was well attended and delicious dinner served.

Reminder that Carver Lions Board meeting is the third Wednesday of every month.

Carver Bluffs

Engineer researched figures for the Developers' Agreement forwarding this to the attorney. It was the council's consensus that a letter of credit is necessary and a letter forwarded to the developer ceasing work until agreement is signed. Engineer was directed to check site. City Clerk was directed to contact the City Attorney regarding limiting city's exposure and contact engineer pertaining to the development. Acting Mayor Terry stated that the city would prefer an agreement in hand before bridge work was begun. Motion was made and carried with all ayes directing attorney to cease work on development until the Developer's Agreement is signed and city has a Letter of Credit.

Antenna

Several residents were present at the council meeting to hear presentation by the Sheriff's Department representative pertaining to the placement of an antenna at water tower site on Mt Hope Road. Councilmember commented about agreement for land use. Area resident preferred antennas not be placed in residential area. However if necessity dictated placement in area then antennas should be placed on top of water tower. Residents were also of the opinion that antenna tower should be more centrally located in the county.

Representative explained that the Department has trouble covering river bottom area since hills block radio waves. Because of the water tower location most of the valley can be reached by radio. Residents were informed that Carver County had four radio tower sites in the county. The most effective tower for Carver would be a self standing tower. There is also an option of a 65' telephone type pole or putting antennas on the water tower. Councilmember inquired about other sites. Deputy responded that there was not any other site on public land that compares to the coverage that the water tower would give. Council commented that antennas on water tower was not an option because the tower is too small.

Citizens inquired about frequency interference. Deputy stated that there would not be interference. Discussion was held reviewing size of building that would need to be constructed. Citizens did not agree with the idea of a separate tower or pole.

Council member stated that Carver County should investigate private land usage. Municipal Utilities Operator stated that antennas on top of tower would use a lot of space. Deputy suggested that possibly brackets could be mounted on top of the tower to help in maintenance. Engineer stated that this suggestion would not be satisfactory because attennas would be in the way when work needed to be done. Operator agreed to think about suggestion as an option. Suggestion was submitted to contact owner of property zoned commercial and industrial.

Owner of the property leasing land to the city for water tower site was not in agreement at this time to the current plant.

Motion was made and carried with all ayes tabling antenna issue until the November meeting and to forward a letter to owner of commercial/industrial zoned property.

Municipal Utilities

Utilities operator received quote from Vessco regarding restoration of the tank at the water filtration plant. The company's opinion was that the tank was in good condition. Estimated cost to recondition would be approximately $48000. New tank costs were estimated at $ 98000. Operator requested direction from the council regarding restoring old tank or purchase a new tank. If restoration was done, then the roof could be constructed on water filtration building.

One council member felt the old one should be reconditioned. Suggestion was submitted about obtaining a possible grant. Citizen inquired about time delay due to problems. Explanation was given that delay has been due to cost of making the plant operational. Motion was made and carried with all ayes to repair current filtration plant. Decision was made to obtain bids for construction of roof on filtration plant. Clerk was directed to research financing.

Operator had gotten information for utility billing system, however prices were excluded. Issue was tabled by motion until complete information was received. Operator discussed necessity to have builder responsible for installation of phone jacks for meter system availability. Suggestion was submitted to have a policy regarding issue. Motion was made and carried requiring phone jacs be installed by water meters in new homes.

Carver-on-the-Minnesota

Carver-On-The-Minnesota members are continuing to work with Scot-Carver Co-Op personnel regarding projects which would utilize the Church- By-The-River.

City Administrator

Motion was made and carried with all ayes to contact Glenda Spiotta for temporary assistance during the city's search for an administrator. Council discussed contacting Creative Management for help seeing administrator. There were three available options to be researched. Council member would contact agency while the clerk contacted another agency and the former employee. A special meeting was scheduled by motion.

On October 17th the council held a Special Meeting regarding searching for an administrator. The mayor stepped down due to possible conflict of interest.

One employment agency presented background of services rendered. The company would talk with personnel and the council to learn type of person needed. They would screen candidates, conduct interviews and narrow selection for council. Agency would provide questions to the council and notify candidates of outcome. Agency was asked about conducting background searches which they would do. This process would take about four to six weeks.

Council discussed and concluded that an administrator would be needed for approximately 20 to 30 hours per week. Motion was made and carried with all ayes to hire individual for approximately thirty hours per week.

Tom Griep expressed interest in the position. He presented proposal to the council. Former administrator presented proposal, as well for council review.
