Volume XXX
Number # One Hundred Eighty Five
December 2001/January 2002

Unknown:

One day a father, of a very wealthy family, took his son on a trip to the country with the firm purpose of showing his son how poor people can be. They spent a couple of days and nights on the farm of what would be considered a very poor family.

On their return from the trip, the father asked his son, "How was the trip?"
"It was great Dad!"
"Did you see how poor people can be?" the father asked.
"Oh yeah," said the son.
"So what did you learn from this trip?" asked the father.
The son answered.
"I saw we have one dog and they have four. We have a pool that reached to the middle of our garden and they have a creek that has no end. We have imported lanterns in our garden and they have the stars at night. Our patio reaches to the front yard and they have the whole horizon.
We have a small piece of land to live on and they have fields that go beyond our sight. We have servants who serve us, but they serve others. We buy our food, but they grow theirs. We have walls around our property to protect us, they have friends to protect them."
With this the boy's father was speechless. Then his son added.
"Thanks Dad for showing me how poor we are."

There is always a different point of view. Sometimes in our struggle for "net worth", we forget what really matters most is our happiness in life. Today inspire a friend or family member to take a second look at their life and decide whether they are "rich" or "poor"
I hope your life is a rich one!

Water Filtration

The council held a work session to talk about the Water Filtration Plant. The city engineer discussed the water treatment and the necessity of a plant. Construction of a treatment plant has been in the works since the late 1990's. New regulations were imposed in 1997 by the DNR regarding the aquifer identified as Mt Simons. New wells being drilled into said aquifer are no longer allowed. Therefore, the engineers have been seeking a second water source.

Testing has detected high contents of radium. Multiple test wells are required to be drilled to meet the gallons per minute capacity demand. The construction of a treatment plant is necessary due to the radium, which is the primary problem. Secondary problems involve iron and manganese.

A slide presentation was given for the potential water treatment plant and well locations. Comparisons were reviewed between pressure filtration and gravity filtration systems. The cost ranges did not include construction of a clear well or transmission main for Wells 1 and 2.

The council discussed the issue further. Hopes were to get the subject on the agenda for a January meeting.

"Talk is cheap because supply exceeds demand."

Municipal Utilities

The council was told that only one bid had been received for the drilling of Well #2. The bid was received from the same company who handled the test well drilling. Motion was made and carried accepting the bid for drilling of Well #2. A pump house to house the well pump will be necessary. Estimated costs were discussed. Motion was made and carried authorizing the engineering firm to prepare plans and specifications for a single room pumping facility for Well #2.

The engineer discussed well water testing and the Department of Health requirements. Suggestion was made that the council tour several plants to determine types of treatment plant best for the City of Carver. Motion was made and carried authorizing the engineer to initiate the design development process proposed for the Water Treatment Plant. Property owners were to be contacted for consent to perform soil boring and percolation tests.

The council reviewed the municipal utilities connection fees and monthly charges. The city's financial advisor, Ehlers and Associates' representative recommended a 4.5% increase for municipal utilities connection charges and an increase of 3% for monthly rates. A presentation on increase reasoning was given to the council. Discussion and questions were talked about. Motion was made and carried adopting the recommendation for municipal utilities' increases.

City Facilities Advisory Committee

The City Facilities' Advisory Committee is made up of council representatives and citizens to address the city's needs concerning the Public Works Department, Fire Department and Municipal Utilities storage needs.

The committee has been studying cost information and alternatives addressing the city's current and future needs suitable for city facilities. The committee would like cost estimates locally. The engineer recommended that the identified alternatives be put into a conceptual design phase to obtain valid and useful construction cost comparison. Motion was made and carried accepting the committee's recommendations authorizing proposed pre-design engineering services.

Land Acquisition

The City Facilities Advisory Committee determined that one option for the storage needs for the three facilities might involve the possible need of more land required than the city owns. A recommendation was submitted to examine the possibility of acquiring a two and a half acre parcel adjacent to the property the city already owns along County Road #147. Discussions would be preliminary concerning the two and a half acres. Motion was made and carried authorizing the staff to contact the property owners concerning acquisition possibility.

"Never be afraid to try something new. Remember, amateurs built the ark. Professionals built the Titanic"

Community Park - Playground Equipment

The Park and Recreation Board reviewed quotes received for the playground equipment. Each bid was close. Handicap accessibility was talked about. The rubber molding on EFA equipment was talked about. The board would recommend to the council to accept the Midwest PlayScapes equipment. The board talked about storage and installation of the equipment.

The Park and Recreation Board received two proposals for playground equipment for the Community Park. The board recommended to the council acceptance of the lower proposal from Midwest PlayScapes. Motion was made and carried authorizing the staff to finalize the proposed purchase of playground equipment from Midwest PlayScapes, Inc.

- Multi-Use Athletic Field

The Park and Recreation Board members' reviewed the council's decision pertaining to the grading issue of the multi-purpose athletic field in the Community Park. Their recommendation submitted to the council was that a grading plan be devised prior to soliciting for quotes.

One board member stated that the entire 9.2 acres of property should be utilized. A soccer field put into the middle of the property limited usage was an opinion given. A diagram illustrating the layout of a soccer field, full softball field, T-ball and an ice skating rink was presented to the board. The proposal was submitted to present this diagram and recom-mend this proposal to the council. Movable fences were also proposed. The Board would like this to be a community project. Lighting would also be necessary.

Another board member suggested construction by members. It was the board's opinion that no other funding was needed, or should be obligated to outside organizations. Question was asked about receipt of letter from the school regarding requirements for grant commitments. Indication by the school for money received was their request of priority for scheduling the fields for school district events. The board's opinion was that this was unjust, since both Chaska and Chanhassen have plenty of their own fields.

The Board then discussed the bid from a grading company. The board was of the opinion that the costs were unreasonable. One member suggested leveling and irrigating the field. Another board member also stated interest in putting the soccer field in themselves. Administrator pointed out that the fundamental underlying question was whether or not a member of an advisory body should be soliciting bids on behalf of the city. Suggestion was then submitted that the Public Works director obtain bids. Formalities needed to be adhered to involving the process.

The board questioned breaking down the plans. The administrator responded that problems arise when breaking down a project to evade the bidding requirements. A preliminary estimate would still be necessary. If the engineer projected the costs to exceed dollar amount limit, the procedure would still require competitive bidding process. If the projected costs were less, competitive bids would still be necessary, but the formal bidding process would not be required.

Two suggestions were submitted. One was to have the city staff review the presented diagram. The second suggestion was to level the field and construct the soccer field. The board recommended that the council adopt the diagram submitted long term, level the field and irrigate the soccer field area. If the council accepted the recommendation, the Park and Recreation Board needed to look at the next step of direction to be sought.

The board further discussed surveying the project, watering, seeding and budget.

A council member reported that a design had been submitted for a multi-use field, which should be reviewed by the staff and resubmitted to the Park and Recreation Board. Council member further stated that it was their opinion that work should be done on the soccer field and get the field completed.

"A day without sunshine is like night."

Minnesota Amateur Sports Commission Grant

The council was told that the Park and Recreation Board recommended that the council adopt the resolution authorizing the staff to pursue securing grant fund from the MN Amateur Sports Commission. Motion was made and carried by roll call vote adopting resolution of grant recipient. Council member inquired about the school district grant and whether or not the city was in danger of losing that grant. The administrator was of the opinion that there was no danger of that occurring. However, he pointed out that the amateur group wants the soccer field construction completed by June 30th of 2002 or that the grant money would not be available.

Council member relayed that alternative design for a multi-use field may possibly have too many different fields in one area. It was his opinion that the Park and Recreation Board would sit on the project for six months and lose the grant money. The administrator and council member requested the issue be scheduled for the Park and Recreation Board meeting agenda The mayor requested the item be put on the council's agenda. The council member pointed out that the bid received was for more money than the project would cost.

Fourth Street Improvement Project

The council continued the Public Hearing on the Fourth Street Improvement project because of previous questions raised. The proposed assessments had been adjusted and lowered. One resident commented that they had not been lowered enough. It was his opinion that some costs had been lowered, yet others raised. Anger was expressed that since the developer of the Orrin Thompson homes wanted the road for their subdivision that the existing homeowners should not be asked to pay for 55% of the road. The administrator explained the details of how 6.5% interest rate for assessment had been arrived at. Motion was made and carried by roll call vote with two council members absent, adopting the resolution for the Fourth Street Utility and Street improvements.

Adult Business Ordinance

The Planning Commission reviewed the issue of an Adult Business Ordinance. The administrator explained the purpose for the moratorium and proposed ordinance. The issue will be discussed further by the two governing bodies. Said businesses cannot be prohibited, but can be regulated Ways to regulate were discussed, one way was through licensing. The Planning Commission recommended that the council adopt the moratorium until the issue was investigated further.

The council held a Public Hearing for the Adult Business Ordinance moratorium. There was no public objection at the hearing. The Planning Commission recommended acceptance, as well as implementing it immediately. Motion was made and carried adopting the resolution authorizing the moratorium.

Public Safety

The council requested that the Sheriff's Department be aware of speeding on County Road #40. Report was given of vandalism that had occurred at the Lion's Park. Request was also repeated for more information from the department. The department is working on a more effective system to keep the city informed.

Fire Department

The council was reminded by the Fire Chief that the Fire Department had submitted an application to the DNR for a grant. Money has been received by the department. The council was told that the department would like to use these funds to purchase a 6-wheel ATV (all terrain vehicle) and trailer. The ATV would be used for access in the bottom lands and other areas that can not be reached with a large truck. Motion was made and carried approving the ATV/trailer purchase with DNR grant funds.

"I am having an out of money experience."

Farewell and Thank You

The mayor read proposed resolution which was accepted by motion Honoring Public Works Director, Ken Frey. Ken retired after serving the city from 1979 until November of 2001. Ken was presented with a plaque commemorating his years of service. Ken also received a standing ovation for his accomplishments from the council, staff and members of the audience. Ken thanked the city and the audience. He also relayed that he will continue to volunteer with the Church-By-The-River renovation project and his work with the Lions Club. Ken is also a Carver Lion. As is Ken's characteristic, true to his nature, he advised the council to get their act together and do what is right for the city. He will be missed.

From the "Villager Tower":

"Congratulations on your Retirement Ken! Good Luck"

Sixth Street Improvements

A citizen inquired about the Sixth Street and Sunny Ridge Drive project. The city engineer stated that the scope of the project had increased. The council discussed the cost and the extent of work needed to be done for this project. The bids received were too high. This issue would be discussed in the future with additional information to be obtained.

The council was updated on work concerning a pond at Sunny Ridge Lane A safety fence was installed around the area. Bids received will be re-examined. As soon as available funds are received, the work will be done.

The administrator informed the council that several Sixth Street residents have standing water problem in their yards. The Public Works Director Schultz relayed his discovery of tree roots clogging drain tiles after digging up the city's drain tiles. He'd corrected the problem, plus installed cleanouts in the tiles. The area had dried up except for one property. This resident contended the standing water was the city's responsibility. The Public Works Director conducted exploratory work; finding that a lateral line was not taking any water. It was undeterminable whether or not the springs had shifted or there was another cause. In his judgment, it was not the city's problem. Director did not agree that the city should pay for repairs on private property.

This issue was discussed further by the council. Resolution and costs of the issue were talked about. Changing the sewer system from grey water to black water at this time was questioned. The director responded that the change could not be done until the area dried up. It was the council consensus that this issue should not be completely resolved by the city. Setting a precedent by conducting repairs on private property was not a solution. One council member stated his amazement at the amount of water running through the drain tile. The attorney advised that private drainage issues were not the responsibility of the city. Question was asked about what happens, if the water and/or ice undermine Sixth Street? The director would talk to the resident to seek a compromise and solution.

Church-By-The-River

Report was given to the council about pigeons entering the bell tower through the roof at the Church-By-The-River building. Two bids for repair had been obtained. The council consensus was to make repairs and accept the lower bid.

Carver Bluffs

The city engineer recommended payment by the city to the Carver Bluffs developer pursuant to the city's agreement for the financial agreement regarding the Carver Bluff's Fifth Addition Regional Storm Sewer. Motion was made and carried authorizing payment to Hans Hagen Homes for work on the regional storm sewer within the Carver Bluffs Fifth Addition.

"An optimist thinks that this is the best possible world. A pessimist fears that this is true."

RiverView Estates Subdivision

Resident read a letter to the council regarding the River View Estates Subdivision issue. The individual expressed their mortification by the lack of respect displayed by some council members towards the city's ordinances, the city planner, engineer, attorney, administrator and the Planning Commission. The individual further stated reasons for objections to approval of the subdivision.
Another resident presented the council with a petition with residents' signatures opposing the development of RiverView Estates Subdivision.
The council continued reviewal of the proposed resolution approving the variances for the subdivision. Citizens were present to also discuss the issue. The attorney explained that upon granting the variances, the developer is required to present "findings of fact" for why the variances should be granted. Elm Drive was one issue requiring resolution. Improvements would be scheduled within the next three years. Suggestion was made that the subdivision properties escrow the established amount of money for this improvement at the time of development. Further explanation was given for the rational of permitting a private street. It was further recommended that each deed be recorded with the information that the city would not ever take over maintenance of this street.

Question was posed about what if the resolution is adopted for the variances and then later learned that the "findings of fact" were false. The attorney stated that he was attempting to draft a resolution protecting the city in the future. The mayor sated that it was his perception that subdividing four lots rather than three was for financial reasons, therefore jeopardizing the bluff line. The developer would be granted three variances if the resolution was adopted.
Variances that had been granted in Carver Bluffs and Carver Creek additions were debated. A petition with two hundred thirty four signatures had been received by the council opposing the subdivision. One citizen expressed concern about lawsuits concerning bluff issues. Council member stated that a 50' setback does not protect the bluff and that other precautions can be taken. The mayor responded that if there were only a 30' set back, a 45' variance to the set back would still be necessary because of the placement of the proposed home in the bluff. Question was asked why the ordinance is not changed prior to granting the variance. The response given was that the Bluff Protection Ordinance was adopted because of development occurring and the necessity for guidelines.

The three council members favoring granting the variances were asked to explain their reasons for being in favor. One council member responded that after looking around the city, he found it funny that these proposed three homes should be the source of so much commotion. He continued to state that the building near the bluff line would still require following strict regulations. Another council member disagreed with this theory, stating that the proposal involves building of homes in the bluff. Another council member stated that his vote would be the same if it were any other developer. It was also his opinion that others are building in the bluff.

Another citizen expressed concern involving other developers in the future. Statement was made that other people had to abide by regulations. One argument presented was the construction of a home in the past on the bluff. Response given was that property owner abided by the ordinance requirements existing at that point in time. Was this home in the bluff or on the bluff?
Another issue addressed was the lift station capacity regarding the municipal sewer. Design was for existing and vacant lots. Would this subdivision take up that capacity was asked. What was the projection if adjacent property was to be developed was addressed? The engineer stated that the pump at the lift station was capable of handling a grey water system for additional homes.
Question was then asked about access ability of the Fire Department. The Fire Department Chief was not able to respond at that point because they had not seen any plans for the proposed development.

Another council member stated that he had reviewed the property and he was of the same opinion as his colleagues favoring the subdivision. The mayor and another council member stated their opinion that there was not a valid justification for granting the variances, the issue was not up front and that the developer was receiving undue consideration as he is a friend of with three council members. Motion was made and carried by roll call vote with three ayes and two nays adopting the resolution granting the variances and approving the preliminary plat of four lots on 2.2 acres of RiverView Estates, except number eight; unless facts turn out otherwise on the Bluff Ordinance. The attorney stated that if an appeal were made, this would occur through a Court of Appeals.

2002 Budget

The council discussed scheduling of an additional budget meeting if necessary. The administrator explained that the procedure and tax statements would be forwarded soon. The final budget could possibly be adopted but a continuance date could be scheduled if needed. Budget adoption and submission to the county is required by December 28th, 2001. Motion was made and carried to schedule a continuation hearing on the budget if the levy were not adopted as planned.

The administrator presented the council with figures from the Carver County Auditor regarding the tax impact on the city's proposed budget. The council discussed the impact. A final budget for review about the municipal utilities enterprise funds were presented to the council. Motions were made and carried adopting the municipal utilities budget and adopting the resolution approving the 2002 budget and levy for the city.

Proposed Fences/Retaining Walls Ordinance

The proposed ordinance for fences/retaining walls had been discussed previously by the council. Minimum retaining wall heights information had been requested. The council discussed retaining an engineer's involvement as a requirement for walls over four feet. The council also talked about a Conditional Use Permit versus a Building Permit. The issue was tabled for a future discussion.

Drug and Alcohol Policy

The council adopted a Drug and Alcohol Policy. The policy involved city staff with commercial licenses required by Federal Law. First Stop Systems could provide random testing services. However, these services would not be provided until the city adopts a policy that complies with the Federal Law. The current policy complies with the State Law. The city attorney's cost to draft/revise the current policy is comparable with First Stops' estimated cost. It was the attorney and administrator's conclusions that First Stop would do a good job at a reasonable cost since this was their specialty. Motion was made and carried authorizing the staff to make inquiries to First Stop Systems preparing draft for revision of the Drug and Alcohol Policy complying with Federal Law and regulations. This draft would be reviewed by the city attorney and the City's Labor Law Consultant prior to submission for the council's approval.

City Administrator

Kevin Carroll resigned as administrator for the City of Carver, effective December 20th, 2001. The council discussed recruitment and hiring processes to be pursued. Several firms could be utilized to search for a new administrator. Four companies had responded with submitted proposals to do the search. The council discussed the costs related with hiring a new administrator. The credentials of the firms were also reviewed. The consensus of the council was to conduct a full service search. Motion was made and carried to contact the two recommended firms of Brimeyer Group and Sathe Executive Search and then hire the firm who could being the search first.

The council then discussed proposed letter of agreement for the hiring of an administrator. The first firm was unable to meet the council's scheduled timetable requirements. The firm of Sathe Executive Search could begin the process immediately. The firm gave the council a brief presentation. They would have a candidate for the council to interview in thirty days. A survey was to be completed by city personnel in order to complete a match for a candidate. The firm's goal would be to have an individual in the position by mid-March. Motion was made and carried authorizing the staff to execute letter of agreement with Sathe Executive Search for their services.

The council discussed the revisions made to the administrator's job description. The council would review these revisions and discuss them later. Then the council discussed reallocation of the administrator's duties during the hiring process.
The council reviewed and held a lengthy discussion concerning the proposed revised job description regarding the administrative position relating to council authority in employee relations. Motion was made and carried adopting the updated job description.

Miscellaneous

The administrator reported to the council that he'd received several calls regarding a school being located in Carver. It was his opinion that this goal could be achieved if the council worked towards that goal.

The council was introduced to Diane Perry who was hired as the Office Assistant.

The council discussed the issue of 2002 Pay Equity reporting requirements. The state passed the Local Government Pay Equity Act in 1984. The city was in compliance in 1999 and required to report again by January 31st, 2002. Helping MN Cities, Paul Ness was contacted to provide a quote to complete the report for the city. Motion was made and carried authorizing retainage of Mr Ness to complete the preparation of the city's Pay Equity Implementation Report.

Spring Creek

During the 2001 MN River spring flooding, a part of the east bank of Spring Creek south of the Main Street bridge slid into the creek. Damage was done to the trail and fence. The engineer presented six options for repairs. The one option recommended involves placement of a crib wall along the east bank. This solution has worked in other ravine areas. An illustration of the crib wall was shown to the council. How would this wall be paid for was asked. Bond money for several small projects was being discussed. The rip rap alternative was inquired about. Public Works Director stated that the slope was too steep for this type of solution and could cause more problems and possibly move the creek over by attempting to make the base wide enough in order for the rocks to stay in place. Motion was made and carried to implement the engineer's option for a crib wall to repair the east bank of Spring Creek.

Computers

The city was told that the firm, LDSI working on the city's computer system are having difficulty getting the computers on line and networked. The process is taking longer than expected.

Once the system is operational, it will be important to have arrangements in place to ensure that the networking system continues operating properly. LDSI recently offered a new service, 'Remote Administration'. This service basically gets help from LDSI on-line. The main advantages for this arrangement are cost and response time. Two options were offered and the recommendation given was "with set up fee" option. Motion was made and carried authorizing the staff to accept a one year contract with LDSI consulting services for the "Remote Administration" for the network computer system.

City Web Site

The administrator told the council about the 2001 League of MN Cities launching a "Web for Cities" initiative. It was designed to bring affordable, user friendly web sites for MN cities that do not have a site on the internet. There are wide ranges of options for creating a web site. However, conclusions were drawn that the "Web for Cities" is the simplest, quickest and least costly. A quote was obtained from Avenet for one year of service, inclusive of a one time license fee and a one year hosting fee. The Public Works Director will work with the firm to get the web site set up. Motion was made and carried authorizing a contract/agreement with Avenet for creating and hosting a city web site for the first year.

Motor Vehicles - City Parks

The council was reminded of previous conversations regarding motor vehicles driving across city property to access private property. The Sheriff's Department has expressed concern about illegal and/or unsafe activity in remote areas. The sheriff indicated an alternative mechanism to restrict unauthorized access. The attorney drafted an ordinance regarding vehicles in city parks. Motion was made and carried adopting the ordinance adding a provision relating to motor vehicles in city parks.

"Conscience is what hurts when everything else feels so good"

Park and Recreation Board Appointments

The council discussed the three Park and Recreation Board seats to be reappointed at year end. Council member inquired about increasing the number of volunteer board members. The council would discuss whether or not to increase the board members at the January meeting. Then the council discussed whether or not to reappoint incumbent members or request applications. The mayor was of the opinion that if incumbent board members wished to remain on the board, they should be reappointed. The issue would be discussed at a later date.

Data Practices

A Data Practices Official would have to be appointed upon the resignation of the administrator. Appointing the cit attorney was discussed, however, he was not eligible since he was not an employee. Motion was made and carried by roll call vote adopting resolution to appoint Data Practices Compliance Official. Motion was made and carried authorizing the staff to work with the attorney to develop a data practices policy.

Tentative Agenda

City of Carver Council Meeting

February 4th 2002 6:30PM

1) Call to Order
2) Approve Agenda
3) Petitions From Residents
4) Consent Agenda
5) Public Safety
6) Public Works & Public Utilities
7) Administrative Services
8) Liaison Reports
9) Other Business
10) Adjourn

Open House

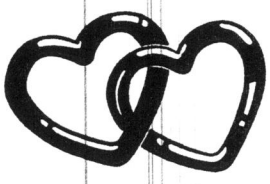

Guess who's celebrating their 80th Birthday? Dwight and John Schultz's mother; Paul Schultz's grandmother, Merva Schultz Grassman.

There will be an Open House Party for her in the Trinity Lutheran Church Basement in Carver on Sunday, February 17th from 2 - 4 PM.

Please stop by for some birthday cake with her and wish her a Happy Birthday. [No gifts]

YellowStone Raccoons

No report this month.....

"The real art of conversation is not only to say the right thing at the right time, but also to leave unsaid the wrong thing at a tempting moment."

Fire Department and Community Highlights

January 2002

January 3rd - Happy Birthday Lucie!
Happy Birthday Harvey!
January 7th - Happy Birthday Leon!
January 8th - Happy Birthday Andy!
January 18th - Happy Birthday Eric!
January 22nd - Council Meeting
January 26th - Happy Birthday Rich!
January 27th - Happy Birthday Paul S!

"Talk is cheap because supply exceeds demand"

Dear Editor:

It was with great interest that I read the editorials in the last Villager Tower. I always thought that people were suppose to sign their names to editorials so I'm guessing the editor Ricki Schultz, is not a Bob Jordan fan. I will be curious to see if Ms. Schultz will print my letter?

I have a different perspective than those two editorials that I would like to share with the citizens of Carver. Normally I would be glad to sign my name, but after reading the Chaska Herald and watching the Carver council meetings on tape I prefer not to. You see, I don't want to be viciously attacked by the former mayor Cindy Monroe and the current mayor, Mr. Weygand, and councilman Mike Webb. I was astonished as I watched the behavior Mayor Weygand and Mr Webb on the cable TV. You were rude and obnoxious not only to Mr. Jordan, but also to your fellow councilman, Mr. Chalupsky, Mr. Lenzen, and Mr. Voelker. While I don't understand all of the issues and concerns it is clear to me that certain people have some type of vendetta against Mr. Jordan

After reading Mr. Chalupsky's comments in the Chaska paper, I question what all the attacks are about. I do know that after serving on committees myself that Mr. Weygand and Mr. Webb have acted very irresponsibly by not supporting the vote of the council. Also I thought that the planning commission and city consultants were exactly that advisors and consultants. If they were suppose to make all the decisions, why would we elect a council?

I applaud Mr. Chalupsky, Mr. Lenzen, and Mr. Voelker for handling themselves in a very respectable manner while being ridiculed and attacked by others. You have demonsrated common sense and a respect for others when you could have fallen into the same irresponsible behavior of Mr. Weygand, Mr. Webb and Ms. Monroe. People have a right to disagree, but they don't have a right to attack others. I have watched many council meetings of the Chaska city council and have never seen such disrespectful behavior. I hope the citizens of Carver will remember the behavior of Mr. Weygand and Mr. Webb if they decide to run for re-election.

A different point of view!

Editorial

Editor: Ricki Y Schultz

I feel it is necessary to respond to "A Different Point of View". The two letters printed in the November/December 2001 issue of the "*Villager Tower*" were "Dear Editor" letters received via mail; NOT "Editorials" by the editor. Printing "Dear Editor" letters does not necessarily reflect the opinions of the editor either. THIS composition however, IS an 'editorial'.

'Editorials' are articles written by an editor. 'Dear Editor' are the opinions of others expressed to an editor. The Chaska Herald's policy requires signatures.

Since you assumed these letters were editorials and unsigned that this editor wrote them is your error and very dangerously presumptuous on your part.

It is also irrelevant and unimportant whatever my opinion of Bob Jordan is or is not. I also did not realize that Bob Jordan had a fan club. The point being that no matter how anyone does or does not feel about this person is not the issue either. Human nature is exactly that; 'human'.

The issue to be addressed and should be addressed is the land. People are the caretakers of the land. We have to respect the land and utilize it wisely, not misuse it to our benefit. People can defend themselves. The land cannot.

Bob Jordan is not the issue. The issue is that Mr Jordan has asked to build a home in the side of a hill because there is not suitable square footage to accommodate a home without requesting variances to allow him to build into the side of a bluff/hill. The advisors and consultants have given reasons and recommendations as to why this should not be allowed more than once. It appears that "no" is not the answer he hears.

Who will take responsibility for misuse of land in the future? There are consequences for every action and choice we each make in our lifetime....

Carver Lions

Those good deeds the Carver Lions do for others never ceases. Over the holiday season, the Lions delivered fifty-five Holiday Fruit Baskets to the local senior citizens.

The Christmas Light Decoration Contest results are in. The committee was very pleased with the results. Everyone did a great job and was fun. The winners are:

1) Wayne Voelker
2) Elroy Wulf
3) Val Preston

Now, remember, it's never too early to start planning. There will be a second Christmas Light Contest the end of 2002 too the Lions have predicted! Thank you to everyone who participated. It was GREAT!!!

The Lions would like to share some upcoming news with you... They are in the process of making plans for their BullHead Feed on Friday, March 8th. By the same token, they are also working on the Pancake/French Toast and Sausage Breakfast for Sunday, April 7th. During these two events the Lions will also have for sale bike safety helmets for children and adults at a discounted cost. There will be different sizes, as well as different color bike safety helmets. It is important to protect biker's heads against injury and the Lions goal is to help everyone to achieve that protection. So come and see and get an affordable bike safety helmet.
Also at the Pancake Breakfast, once again, the Lions will be offering free diabetes testing. Anyone interested in the diabetes testing should fast prior to breakfast that morning.

New members are always welcomed also. The Lions meet the first and third Wednesday of each month. There are lots and lots of fun things they are involved in. A lot of self gratification can be achieved by being a part of this great organization. So many benefit from these good people with BIG Hearts and Helping Hands! So if you want to be a team member, come and join in the fun. It's never too late!
