October/November 2002

In Memory of Paul and Shiela Wellstone

City Administrator Vacancy

At the September 16th council meeting, the council adjourned for a closed session for a six month evaluation/review of the City Administrator, Diana Murack. A motion was made and carried terminating Ms Murack immediately with a severance package.

Allina Paramedic Service

Brian Nord of Allina Paramedic explained to the council their services. The top reasons for calls in Carver were explained and there was a response time issue. Mr Nord stated that he has been working with Chaska individuals who were attempting to start an ambulance service. Ambulatory services are regulated by the State of Minnesota. Allina would be working on response times.

Question was posed regarding either/or (Allina or Chaska) service or if the two would supplement one another. It was Mr Nord's hope that Chaska service and Allina would supplement one another. Allina's home base was Savage, however, services assigned to Carver would be located in Jackson Township. Question was asked what the city needed to do to ensure service. Allina could be contacted for questions, but the decision will be made by the state.

Street Lights

Since the downtown project has been delayed, the Public Works Director informed the council that the lights, which were to be used, would have to be put back into storage. Some of the present lights have been repaired. More repairs will be required for one light.

Church By The River

Carver Lions representative, Ken Frey discussed work and quotes for the Church-By-The-River restoration project. The front entry and side doors all needed to be rebuilt. The floors would required sanding, staining and sealant. Exterior work would not be done yet. Costs for repairs were talked about. The length of time for completion of scheduled work depended upon how many Lions volunteered and were able to schedule to work.

" Television has proved that people will look at anything rather an each other." .....Ann Landers

"It is the responsibility of every adult... to make sure that children hear what we have learned from the lessons of life and to hear over and over that we love them and that they are not alone"

Village Hall

The council complimented the Lions on the appearance of the exterior façade of the Village Hall extending an appreciative thank you to them.

The Heritage Preservation Commission members reported receiving compliments about the Village Hall. Although there were also some who expressed problems with the electronic sign in the historic district.

The Park and Recreation Board reviewed their previous recommendations regarding Village Hall rental fees to the city council. It was the Board's opinion that the damage deposit should be increased. The previous rental consumers neglected to clean up and an altercation had occurred resulting in involvement of the Sheriff's Department. The board was also of the opinion that fire district residents should be charged a higher fee than city residents should. Carver residents pay property tax for the Village Hall.

The board proposed to submit to the council that the Village Hall rental fee per floor should be $100 and a $500 damage deposit for Carver residents. That the Village Hall would not be available for non-residents, except for charitable organizations. Any clean up after an event that is not done would result in costs equitable to those of a professional cleaning service. Renters with previous record must appear before the council for a rental agreement.

Stop Signs

Resident presented the city council with a situation requesting four-way stop signs at the intersections of Carver Bluffs Parkway and Ramsey Avenue and Carver Creek Circle. At both of these intersections are children and bus stops. Visibility and speeding are both problems in this vicinity.

This issue had been brought to the council's attention previously. The engineer pointed out that these are collector streets and it was not encouraged to erect stop signs. Suggestion was made to put in a cross walk. The mayor's opinion was that without stop signs it was not an appropriate bus stop.

The engineer also relayed that there was poor visibility pulling onto Carver Bluffs Parkway. This item would be discussed more at a later date. Suggestion was also made to contact the bus company inquiring about the intersection bus stop choice. The city attorney also submitted suggestion that the engineer devise procedures for the type of situation for future development.

The engineers reviewed the situation regarding stop signs in the Carver Bluffs Subdivision. It was recommended to put a stop sign at the intersection of Carver Buffs ParkWay and Ramsey Avenue. Traffic control changes should be installed, as well, if decision were made to put Stop signs in. It was also recommended to review proposed intersection control with the school district as it may impact their bus stops. Motion was made and carried to place four-way 'Stop' signs at the said intersection.

There was also a discussion held pertaining to a petition requesting a stop sign on Oak Street. This location would be discussed at a later date regarding a stop sign.

The council reviewed the issue of traffic at Oak and Third Street East. Recommendation was made to increase enforcement at this intersection. Traffic volumes should be examined to determine which direction would be best suited for a 'Stop' sign. Speed bumps were discussed as an option. The Public Works Director voiced his objection to speed bumps because of road maintenance and snow plowing.

"I like not only to be loved, but to be told I am loved" - George Eliot

Sixth Street

The city engineer reported that at that point in time he had been unable to meet with residents Some residents were of the impression that the council had limited truck traffic on Sixth Street and they had concerns regarding existing springs in the area. The engineer had reviewed the plans on file showing drain tile addressing springs.

The engineer had inspected the site pertaining to the issue of springs. Everything appeared to be functioning properly.

The county had also been contacted to inquire about road work pertaining to County Road #147. The county proposal for work to be completed in 2003 for County Road #147.

A resident questioned speeding on Sixth Street. It was pointed out that other areas are also experiencing speeding problems. It was also pointed out that there should be an ordinance in order to enforce the issue if no trucks were to be al-lowed on Sixth Street. Monitoring truck traffic was questioned. Resident stated his count one day. A council member also commented his count upon monitoring the truck traffic. Comment was made that when Sixth Street was built; authorization has been only for local businesses. If a law were proposed, then this would also apply to businesses on the street. Permits being issued were asked about. The attorney announced that he'd drafted the ordinance of "No Through Truck Traffic", but this is hard to en-force. Turning left off of County Road #40 onto Highway #212 was talked about again and about how difficult this turn is for trucks. The life expectancy of the road was discussed.

The engineer updated the council on truck usage on Sixth Street. The street was designed for 9-ton usage. The residents major concerns were maintenance cost of of the road if it did not hold up for its twenty year life. The area had a history of springs. The engineer checked the road and construction. It was his opinion that the street and the curb were holding up well. It was also the engineer's opinion that the road should be able to handle 9-ton traffic at 150 to 300 heavy commercial vehicles trips per day. Alternatives were discussed. One alternative was to allow 9-ton traffic and monitor road conditions. If, in the future, the pavement showed signs of distress, then road restrictions could be imposed on the road at that time.

One property owner thanked the staff for meeting with all of the residents. Despite the information, the residents were still concerned with trucks destroying the road because of the existing water problems with springs. Empty trucks using the road was alright with the residents, but loaded vehicles should use Highway #212 was their opinion. The issue would be monitored and discussed further at a later date.

River View Estates

A letter from attorney Nicklaus representing the developer of River Estates has been received concerning the development. The developer is ready to progress with the construction phase of the development, but the road access issue for Fire Department vehicles is still not resolved. Nicklaus compared this issue to the Hidden Bluffs road issue.

One council member pointed out that RiverView Estates is required to construct a turn around, but Hidden Bluffs is not required to construct a turn around. The mayor pointed out that a turn around is being constructed at Hidden Bluffs development. The council member argued not on Seventh Street. The engineer pointed out that the developer does not own Seventh Street and the distance is less than 150 feet. The State Fire Marshall's ruling has not been received yet. It was also pointed out that if a turn around is required in Hidden Bluffs development then the city will be constructing it, not the developer. Question was asked of the Fire Chief regarding the proposed "T" turn around that RiverView Estates' developer has proposed.

The Fire Chief pointed out that an appeals board could be comprised of local Fire Department Fire Marshall's. The State Fire Marshal's response was not expected soon. An appeals Board or a variance were the other options available at this time. The developer commented that the road being constructed could be considered a fire access road. Council member inquired if Hidden Bluffs turn around had been approved by the Fire Marshall. The Fire Chief pointed out that Hidden Bluffs meets code. RiverView Estates developer requested a variance. The Fire Chief again pointed out that the variance can not be less than Fire Code requirement. The decision was made that the developer, the engineer, the attorney and the Fire Department meet and resolve the issue.

The council was approached with proposed modifications to the development. The developer was told that a fire truck does not have to back up more than a 150' distance, then it was not a problem. Question was asked if the engineer or the Fire Chief has reviewed this modified proposal. Question was also asked why this issue was not on the agenda. The mayor called for this to be scheduled on the next meeting's agenda.

The attorney pointed out that he was aware of this plan, but that the uniform fire code is the first issue and the second issue is not the same as Orrin Thompson Homes. The council was also informed that the ninety day filing period has lapsed. The attorney repeated that the city code states that a plat has to be recorded within ninety days or it is void. The RiverView Estates plat has not been recorded.

The council discussed the final plat of Carver River View Estates. The engineer addressed the turn around location and length, berms and marking of conservation easement. Three options were submitted with a recommendation from the engineer for Option #1. The landscaping of berms, depressions, and designated conservation easements were discussed. There was not complete agreement with landscaping. The Fire Chief had received the memo late in the same day as the discussion occurring and had not had time to communicate with the Fire Marshall. Question was asked if the Carver County Soil and Water Conservation District had reviewed the changes in the plat. Mr Cal Haasken is now the present developer of River View Estates. The options discussed were not acceptable with him nor the property owner. The drafted resolution from the city attorney was not acceptable to either men either. It was their opinion that an amendment to the original resolution should be done and presented a drafted proposed resolution amendment.

Property owner inquired if the city had to sign an approved plat. The mayor pointed out that the conditions of signing the plat were based on payment of fees. The fees had not been paid therefore, the attorney advised not signing the plat. The developer's attorney, Robert Nicklaus did not agree with this condition, having drafted a resolution affirming prior approval. The mayor pointed out that the city attorney stated that a new final plat was necessary. A discussion pursued whether or not the plat was valid or invalid. Motion was made, but dropped, to reaffirm the accepted resolution. The issue was argued that the turn around, catch basins etc were not agreed with and had been changed from the original plat. Motion was made again with a second, but the debate continued on several various conflicting issues involved with the development. The turn around had not been approved by the Fire Marshall. The bluff ordinance issue was thrown into the discussion. One council member stated that it was his opinion that this developer was made to do more than other developers. The group was reminded of the opposition to four houses being built into the bluffs. The property owner stated that it was his expectation to receive equal treatment as other developers. Motion was made and carried with three ayes and two nays to reaffirm the final plat approval of River View Estates.

The adjoining property owner to the proposed development has discovered some inconsistencies with property boundaries between the two properties. The county surveyor is aware of the issue. Question was asked about boundaries being wrong and plat approval. The city attorney was not available to answer the question. The property has been surveyed and now the legal description is incorrect. The developer was not aware of this issue the council was told. The county surveyor would not sign off on the plat unless the property issues were settled.

"That you may retain your self-respect, it is better to displease the people by doing what you know is right, than to temporarily please them by doing what you know is wrong."

-William J. H. Boetcker

Public Works

Public Works Director has been contacted by a property owner of property in the river bottoms needing access via the Ash Street bridge. The bridge is in poor condition. It was recommended that pedestrian traffic use this bridge only. It would not be considered wise to put a lot of money into a bridge that benefits only one parcel.

The Public Works Director met with the county bridge inspector and a structural engineer from Bonestroo. Recommendation was given to close the Ash Street bridge. There may be State Aid money for repairs of the bridge, but the criteria dictates how much money is available. The property understands at this time that the bridge is not usable. However, he would like access to the property.

The Park and Recreation Board wants an ice skating rink the Director told the council. The Lion's Park is the most suitable site for a rink.

Community Park

The Public Works Director has met with the grant individuals for the soccer field. It was reported that this money would still be available to the city from the MN Amateur Sports Commission. The school district money may also still be available.

The Public Works Director expressed concerns about FEMA Grant money, which the last two administrators never closed out paper work. He would attempt completing the work in this file.

It is also important that it be understood that the grant from the MN Amateur Sports Commission is a matching grant. The Public Works Director also spoke with District #12 representative concerning the grant for Carver. Contributions can be used for multi-purpose field. Requirements pertaining to the monetary contribution would be forwarded to the director.

Carver Creek 5th Subdivision

The Carver Creek 5th final plat had been previously approved, however some changes have become necessary. Riesgraf Road would have to be moved due to bluff set back issues and to be able to construct a house on one of the lots. Council member inquired about excessive work being done and the requirement for a special permit. The grading permit covered the excavation the engineer explained. Motion was made and carried directing the staff to prepare a resolution approving revisions of the final plat.

The council reviewed the Carver Creek 5th addition developer's agreement. Motion was made and carried approving final plat for Carver Creek 5th Addition.

"You can stand tall without standing on someone. You can be a victor without having victoms"

- Harriet Woods

Building Construction

The council was told of a potential problem. A building had been constructed three feet from the property line instead of the six foot set back requirement. The city could require tearing the structure down because it does not meet city code. The staff was directed to check into the situation, appraise it and come back to the council for further direction on the matter.

Bluff Ordinance

Motion was made and carried with three ayes and two nays directing the staff to draft a new bluff ordinance that is more in line with surrounding cities which would include a 30' bluff setback and give the city engineer final approval of steps necessary to protect the bluff. The council discussed this issue. Erosion problems, set backs, and benefits were talked about. Council member pointed out that the current ordinance does not mention how the bluffs would be protected.

Miscellaneous

The city has been contacted regarding development in the industrial park. Two council members scheduled a meeting with Pheizter Development.

The Park and Recreation Board would be asked to discuss a "Park Rules" sign rather than individual signs in the parks.

Motion was made and carried directing the staff to draft a private well permit for the Carver Bluffs Homeowner's Association.

The council had received a letter regarding the fire contracts. The council briefly discussed the request. The staff was directed to forward the requested information to the townships.

"The lovely thing about being forty is that you can appreciate twenty-five-year-old men more.

- Colleen McCullough

Black Sox Turkey/Ham Bingo

The Black Sox are having their annual Turkey/Ham Bingo.

When you ask? The Turkey/Ham Bingo will be occurring November 22nd, Friday evening beginning at 7 PM until 11 PM. Food and beverages will be available. Be sure to come to the Village Hall and share in the fun!!!

Carver Lions

The Carver Lions want to thank everyone who participated in Halloween party. There were 144 children who attended the Halloween party. The kids had a good time. And what is really great is not only did the kids have a great time, but the food shelf benefited too. The party raised $288 for the food shelf, along with 111 pounds of food. Great job everyone! Thank you!!!! There was a full house and a lot of new families. Thank you to all the volunteers.

It's almost that time of the year again. The Lions have begun discussions about a Second Annual Christmas Light contest. Watch for further details. Carver residents will probably get news in the next issue of the *"Carver Quarterly"*.

The Lions would also like you all to know that they have recruited three new members also. They would like to welcome Mark Bartusch, Rick Edlund, Bob MacMullan, John Nelson and Paul Andrescik.

Carver Youth Baseball/ Softball Association

The Carver Youth Baseball/Softball Association wishes everyone a Happy Holiday Season. Watch for upcoming news around the beginning of the year. The CYSBA would also like to thank everyone who helped with the season and helped with the association's good year. Thank you each and everyone of you.

RiverSide Park

The Public Works Director told the council that gates are being installed at the entrance of RiverSide Park and will be closed at 10 PM. The council was told about the incredible amounts of trash being dumped in the park. The STS crew spent and afternoon cleaning the area. After this clean up, an air conditioner was dumped in the park. Signs are posted concerning park hours. Request was made to place park hours on the gate.

Stork Announcements

The stork was really loaded down. Two babies were brought to Carver. There were probably more, but the stork only told the editor about two. So you'll have to talk to stork about slacking and not relaying the news if you had a baby too. If the stork lost the phone number, here it is again: 952) 448-5126 % *'Villager Tower"*.

Lisa's Place is all abuzz with the news that Lisa and Troy had a little baby boy on September 10th. Cody Daniel weighed in at 7 lbs 5 ozs and was 20" long. Congratulations guys!

Then up and over at Harvey's Bar, Keith and Dee and little brother, Nick welcomed the little girl, Faith Loraine who was born October 6th. Faith weighed 7 lbs 10 ozs and was 19 ¾" long. Congratulations Keith and Dee!

Right-of-Way Vacation Request

The council held a Public Hearing regarding the request to vacate the right-of-way on Oak Street. A survey was reviewed. Request was made to vacate the alley way. Half of the alley would be given to the Trinity Lutheran Church. The church would prefer to retain the seven and a half feet as a public alley. A precedent had been set previously I a similar situation. Motion was made and carried vacating seven and a half feet and the other half to remain public and directed the city attorney to draft a resolution to this affect.

Building Inspector's Contract

The council discussed the building inspector's contract with Ms Tracy Salzl. She had expressed concern regarding working until the end of the year as she was told that this was the plan. The attorney expressed his hopes that the two inspectors could work together until the end of the year per the council's direction when the contract had been approved. Motion was made and carried approving honoring the contract with Building Inspections until the 31st of December. Statement was made that she'd served the city well for many years. She was personally thanked for her services to the city.

Fire Department/Public Works Building Proposal

Council member stated that he could support a combination building for the Fire Department and the Public Works Department. However, it was his opinion that the cost was a lot of money and the residents should have a voice in the issue. Motion was made and carried with three ayes and two nays adopting the resolution to put the question of a combination building on the November ballot. There was further discussion on the topic. The mayor and a council member stated their opposition to the referendum because the building is needed. If the referendum fails, each support construction of the building. The attorney pointed out that the council could still build if the referendum fails.

The mayor reminded the council of the two special information meetings concerning the referendum on the referendum for a Fire Department/Public Works Building.

"Beyond a critical point within a finite space, freedom diminishes as numbers increase...the human question is not how many can possibly survive within the system, but what kind of existence is possible for those who do survive."

- Frank Herbert, Dune

Carver Ridge

The Planning Commission held a Public Hearing regarding an application for a Conditional Use Permit for grading in the bluff set back area in Carver Ridge 2nd Addition. The city engineer explained that the ordinance restricts removal or alteration of vegetation within a bluff set back area, except for a lawn; if the grading is at least twenty five feet away from the top of the bluff and no tree 6" in diameter or larger is removed. The ordinance also relates to topographic alterations/grading and filling. A Conditional Use Permit is required if more than ten cubic yards of material is moved within the bluff set back area. The Conditional Use Permit would be granted if the proposed alteration does not affect bluff set back area or other property; drainage does not increase and a detailed landscape and erosion control plan are all provided. Discussions were also held talking about adjusting grading to stay away from bluff, save some trees and no retaining wall on one lot, but grading a three to one maximum slope. Motion was made and carried recommending approval of the application for a Conditional Use Permit meeting all recommendations and requirements by the engineers.

The Planning Commission reviewed the final plat for the Carver Ridge Addition requesting approval. The Planning Commission recommended approval with many stipulations.

The council reviewed the Planning Commission's recommendation regarding the Conditional Use Permit for Carver Ridge developer. Motion was made and carried approving the Conditional Use Permit. Motion was made and carried directing the staff to draft a resolution for approval of the final plat for Carver Ridge.

Motion was made and carried adopting resolution accepting the low bid for work on the Carver Ridge area lift station improvements.

The engineer discussed invoices for streets and utilities for Carver Ridge 1st and grading work for Carver Ridge 2nd from the developer. Recommendation was submitted that the total deposit for the Pledge and Payment not be reduced to less than the amount suggested. Motion was made and carried with all ayes to that affect. Motion was made and carried adopting resolution approving the final plat of fifty two residential lots and one outlot on acreage for Carver Partners. Motion was made and carried adopting the ordinance rezoning said property from agricultural to residential for Carver Partners.

City Planner

The Planning Commission had interviewed several individuals for the city planner position. The Planning Commission had narrowed the candidates down to two for the city council to make the final decision. Two candidates were interviewed by the city council. The second candidate expressed she'd had experience with historic districts and could help the city obtain a CLG [Certified Local Government] designation. Each candidate was asked about experience with annexation processes. The attorney urged the council to make a decision. Motion was made and carried to hire McCombs Frank Roos and Cindy Olness as the City Planner.

Conditional Use Permit Request

The Planning Commission held a Public Hearing concerning an application for a Conditional Use Permit and Variance for bluff encroachment for a deck. The applicants presented detailed information, pictures, survey and details. The applicants, engineer and building inspector all reviewed the many restrictions involved with the bluff area. The problem area appeared to be the steps. The Planning Commission recommended approval for the Conditional Use Permit and Variance for the deck request.

The council reviewed the Planning Commission's recommendation pertaining to the Conditional Use Permit for a deck. The attorney recommended not granting the Conditional Use Permit and Variance as it would set a precedent. The homeowners stated that it was the builder's short sightedness on their part and they should not be denied a deck because of their error. Reminder was pointed out that protection of the bluff was necessary. Another council member voiced his opinion that it was a bad ordinance. Motion was made and carried with all ayes approving the Conditional Use Permit for the deck, but not the variance request.

At a later meeting, council member made the motion and it carried with three ayes and two nays approving the variance requested for a the construction of a deck.

Public Safety

Sheriff Bud Olson had considered the previous discussion with the city council. The thinking was that Carver could be used as a pilot case for the pilot program being considered. In order to address the accountability concerns, it was determined that the computer software could be modified I order to record hours the deputies spend in Carver. Motion was made and carried with four ayes and one nay to contract with the Sheriff's Department. The sheriff assured the council that the monthly report would be forthcoming. It had been delayed due to some other cases interrupting their efforts. The sheriff also pointed out that they had responded to an altercation occurring in town recently.

Municipal Utilities

Work on the well house has begun. The council discussed water pressure in Sunny Ridge.

The Carver County HRA Executive Director contacted the city regarding the purchase of the house on Oak Street. Communication has been ongoing. If the city did not purchase the house, it would be utilized for low income housing. Discussions are to continue at a later date on this issue.

Motion was made and carried adopting the resolution receiving the Engineer's Feasibility Report and calling for a hearing on Well #2 and Well #2 Pumping Facility. The council held a Public Hearing on Well #2 and the Pumping Facility. The public's input was requested. The engineer reviewed the project for the residents commenting that the estimated cost for the improvement was approximately $425,000.

Dear Editor:

The townships of Dahlgren and San Francisco have unresolved concerns with the joint cooperative agreement and contract for service that the City of Carver wishes us to enter into. The mere labeling it as a Joint Cooperative Agreement would indicate that the three parties have come together with terms that are agreeable to all parties. Townships have a long history of careful spending. We pride ourselves on spending only the necessary money required to get the job done. The City of Carver hired an attorney who put together a contract that they call a joint powers agreement without presenting us with budget information or consulting with us. There are many points in the contract that are beneficial to the city only. The contract reads that "the city shall have the sole responsibility of it s Fire Department without interference from the townships in all decisions concerning administration thereof including future expansion of plant or capital expenditures for equipment shall rest with the city." The needs of the townships and those of the city vary quite a lot. Types of equipment and their service level provided all vary. Fire insurance coverage is much more expensive for rural lots because fires usually end up with a total loss. When questions were raised about the contract we were met with a hostile take it or leave it attitude.

The two townships are proposing that the following issues be addressed before entering into any contract with the City of Carver.

The fire contract is approved at our annual meetings in March where our citizens have a voice. All parties review the budget data so the townships can question the expenditures that appear to be of no benefit to them. That the assessed value be based on a one and a half acre building site with buildings as it is with school districts. Assessing open land is a new twist in the contract that increases the amount that farmers must pay with no increase in service: open land has very little need for fire service. Any capital outlays shall be agreed on by the joint powers.

We sincerely would like to work with the city in continuing a good working relationship for fire coverage. It is important that if the City of Carver expects our partnership to be equally funded the cooperative parties must be given some power when making decisions. We should not levy taxes for capital investments that are not owned by our township. The City of Carver should not hold us hostage with a contract that excludes our input. We feel that the City is misleading the citizens with claims that the townships are going to share the costs of building a new fire station. We feel that joint cooperation is the key to responsible spending.

Dahlgren and San Franscisco Township Boards

Carver Fire Department and Community Highlights

November 2002

November 4th - Council Meeting
November 5th - Election Day
November 7th - Heritage Preservation Meeting
- Drill Night
November 11th - Veteran's Day
November 12th - Park and Recreation Board Meeting
November 18th - Council Meeting
Drill Night
November 19th - YellowStone Raccoons
November 22nd - Happy Birthday Tim!
November 23rd - Happy Anniversary Deb and Loren!
November 26th - Planning Commission
November 27th - Fire Department Meeting
November 28th - Thanksgiving Day
November 29th - Happy Birthday Ken!
November 30th - First Day of Hanukkah

YellowStone Raccoons

The YellowStone Raccoons 4-H Club held their October meeting at Emma Krumbee's in Belle Plaine. The club entered a scarecrow in the Annual ScareCrow Contest. The YellowStone Raccoons placed 3rd Place with their ScareCrow. Congratulations! The club enjoyed the hayride, petting zoo and a good time.

Enrollment for 4-H and project registrations are due in to the Extension office November 1st.

The club will be meeting on November 19th at Jackie and Ashley Murphy's home at 6:30 PM. The club will start plans for Christmas.

The YellowStone Raccoons would like to wish everyone a Happy Holidays!

Carver Tax Service

Hello, my name is Cathy Steigerwald. I am very excited about opening my new business in the City of Carver. The business name is Carver Tax Service and is located at 221 Broadway, next door to the Carver Hair Salon.

I will be offering income tax and accounting services to individuals, trusts and small businesses. Along with those services, I will also offer elec-tronic filing and various fast refund programs.

I am an enrolled agent to practice before the IRS. To receive this designation, one must pass rigorous test of all types of tax knowledge, along with an extensive background check. This designation allows me to represent tax payers in audits and other situations with the IRS as the taxpayers' advocate. It also requires me to adhere to many professional and ethical rules and complete educational requirements in the tax field every year. That assures that I'll always be up to date on tax law and can provide the best possible service to my clients.

I will be open part-time hours starting in November and then full time, plus hours during tax season. Services will be available year round. Prior to my starting my own practice, I worked in the tax department of a CPA firm in Minneapolis and managed an income tax firm in Puyallup, Washington for many years.

My family moved to Carver almost two and half years ago when my husband was transferred with SuperValu. Before that we lived in the Seattle area. We were very excited to move to Minnesota as we are huge hockey fans. We signed up for Wild tickets as soon as we knew we were moving, which was before the arena was even completed! We love living in Carver and hopefully the residents of this area will support my new business. I welcome you to stop in, say hello and get answers to tax questions you may have.

You can reach me via phone, 952) 240-5279 or you can look me up on the internet at carvertax@mn.rr.com.
I look forward to meeting you and doing business with you.
