Number # Two Hundred Four
March/April/May 2004

Dahlgren Township

The Dahlgren Township Board talked about blacktopping of Maplewood Road, west of County Road #43 at a development entrance. Previous conversations involved requirements of blacktopping all the way to the corner of Maplewood and Inwood Road. Discussions concerning this issue would be continued later.

The county engineer was at the meeting to talk about township road change proposals. There were concerns with the intersections of County Roads #45 and #50 and County Roads #40 and #50 and Highway #212 and County Road #43. Turn lanes have been requested, but these are costly. Applications have been submitted to the Metropolitan Council for funding. These were not priority for the Met Council. The county also has a list of requests for upgrading. The county's budget has been reduced substantial-ly. The county may be considering bonding for funding. Dahlgren Road is in need of repair as well.

The township board talked about Fire Protection. The County Auditor and the County Deputy explained to the residents how a Taxing District works. Currently the township is serviced by two fire Departments. The protection is paid with Revenue Funds. This is calculated by the tax capacity. Changing to a Taxing District would involve and Assessment Fee paid to the County for an assessment fee on each parcel. A fire fund would then be set up in a separate fund. The township residents made the decision that the board should continue fire protection that is presently in place.

The board was presented with a proposal update on Contracting Service with the county sheriff's department. The cities and the townships have been included in discussions considering a Regional Contract with dedicated deputies. There are ten cities and one township that contract with the county sheriff. Options and a base level of service from the sheriff's department were discussed.

A representative of the City of Carver Council, and Tollefson Development representative were invited to the board meeting, but no one attended the meeting. The city had given the board maps involving the expanded area involved. The Alternative Urban Area wide review process substitutes for any EAW or EIS required for specific qualifying projects. The City of Carver would like to be the Responsible Governmental Unit who governs the Alternative Urban Area Wide Review Process. Senator Julianne Ortmann attended the meeting to review the annexation process with the board and residents. She suggested contacting the Senate Chair, Linda Higgins to reflect views on an annexation hearing. The township board was advised to research how much land a city can annex at one time and how agricultural land equates into the process. Another meeting would be scheduled to discuss this proposal. The meeting was scheduled for April 6th at the township hall.

The board gave "Statement of Results of Canvas" for election of officers at the Township Annual Meeting. Jack Murphy was declared Supervisor for the term of three years. Janice Buckentine was declared Town Clerk for a term of two years.

"Getting fired is nature's way of telling you that you had the wrong job in the first place" ** Hal Lancaster **

Mueller Gravel Pit

The City Administrator explained to the council the issues related to the homeowners and the Mueller Gravel Pit. Citizens expressed concerns regarding the street adjacent to the Public Works/Fire Station complex which should not be allowed to be utilized at any time; the creation of a continuous berm on the east side of the property; the EAW only has reference information that is up to date; flooding of Carver Creek and environmental concern of eventual increase of dust due to pit expansion. The administrator reminded that the EAW responses were due on the 17th, if citizen support of concerns were desired then action would have to be at that time.

Another resident listed more concerns to include sound barriers if a berm were not plausible. There was a request for flashing lights on County Road #147 in several places and reduce the speed limit on the road. Comment was made that there was the reality that these issues would be required to be dealt with by the county but the residents would like the support of the city. The residents receive a lot of noise from traffic and from the pit and would like a sound barrier.

Mueller representatives were also present at the council meeting. The gravel pit could not guarantee that there would not ever be a road constructed by the Fire Station/Public Works facility. However, presently there were no plans for any access in this area. The proposed pit expansion can be viewed at the gravel pit. There had been a suggestion of planting trees, but it appeared that residents favored the presence of berms instead. Gravel mining processes were explained and that the mining equipment is sensitive to dust, therefore there are efforts to minimize dust. Statement was also made that berms are approximately six hundred feet wide at the base taking away a large area for mining potential. The mayor interjected that the city had no desire to become involved in the final plans, however would like to see the residents and the gravel pit reach an agreement. The pit will be using chemicals on one road for dust suppression and another road will be paved.

The representative from Mueller's addressed the Carver Creek issue. The creek is approximately eighteen hundred feet away from the pit and water never has reached the pit. Three filtering ponds had filtered any water that eventually runs into the creek. The environmental hazards are monitored by standards, checked annually and regulated.

The gravel pit is out of the city's jurisdiction. But they were thanked by the council for addressing problems that were brought to the city council. The Fire Department would be encouraged to water the berm if the summer was dry.

Did You Know...

...that in the 1890's R. J. Neunsinger owned a saloon and hotel in Carver on the site of the present day Carver City Hall. R.J. was the son of Carver County businessman and farmer, John Neunsinger, who is 1859 met a German immigrant farmer arriving in Chaska by steamboat and sold him his Laketown farm. The German immigrant was Wendelin Grimm, who subsequently developed the famous strain of winter-hardy alfalfa, the first in North America, and one that became so important to northern farmers.

Tollefson Development

Resident questioned the council about their absence at a meeting at the township for Tollefson development proposal. The council responded that there had been miscommunications pertaining to the meeting. The mayor stated that there was no agreement in place with Tollefson at this time. Council member also pointed out that there was not even a concept plan in place and the Comprehensive Plan was also still being updated. The council briefly discussed the proposed development and attending the scheduled township meeting.

The City Planner reported to the council that there was a meeting scheduled with Dahlgren Township regarding the Tollefson Developers for land in Dahlgren Township. The amount of land currently proposed for development by Tollefson has sufficient development potential to warrant a mandatory Environmental Impact Study under the environmental review requirements. An alternate process was being proposed as an appropriate form of environmental review for this project. This alternative is called an 'Alternative Urban Areawide Review. The property involved in the proposal is located in Dahlgren Township and governed by County regulations. However the proposed development would be requesting annexation into the City of Carver and application of Carver's Comprehensive Plan and development regulations of their proposal. The city planner pointed out that approval of any development for these proposed properties would ultimately be granted by the City of Carver, therefore it was considered only appropriate for the City of Carver to be appointed as the Responsible Governmental Unit for the Alternative Urban Areawide Review.

The city planner continued to explain the necessity of comprising a Comprehensive Plan Work Group to update the Comprehensive Plan to be inclusive of the Tollefson Development proposal. Dahlgren Township has already appointed representatives to serve on this joint committee. The mayor recommended representation include two members from the Planning Commission, one member from the Planning Commission and two from the council. Another council member recommended representation from the Heritage Preservation Commission. Motion was made and carried with four ayes and one nay that the Comprehensive Plan Work Committee consist of one member from each city committee. The committee of four city representatives and three township representatives would be scheduled to meet at the end of the month. Tollefson Development representatives presented their proposal to the Dahlgren Township residents and board members. They stated that their proposal was not endorsed by the City of Carver nor by the Dahlgren Township Board. They were there to present their vision to residents and evaluate the area in order to develop. It was also explained that the Alternative Urban Area Review would only give the city authority to conduct the study and that it was not a binding contract. This Alternative Review would also take approximately one year to complete. This Alternative Review was a state process involving many factions of different various state agencies. The developers requested to have residential input so that it would be developed and progress in the way that the community would wish to have this development look versus just going ahead and having development not thought through thoroughly. As the developer pointed out, 'their vision'. It was their opinion that the Alternative Urban Area Review process was more thorough and more detailed than an Environmental Impact Study which would benefit the residents. The developer would be responsible for the costs of the study. The long range plan of the developer would be to then have this area eventually annexed into the City of Carver which was why the city be asked to be the Responsible Governmental Unit for the ultimate end product of the 'visioned' development. The developers goal for beginning their 'vision' would be 2006. This development would take years to complete. Their estimated time frame was approximately ten years. If the City was not appointed as the governing unit of the Alternative Urban Area Review, then ultimately this responsibility would then fall on the township board or on the county. The City of Carver Planner told the Township Board by state statute the formal request had been initiated therefore a decision was mandatory by the boars. The township requested timeline to start the process. The township would contact their attorney for direction for this issue and make a decision at a future meeting.

Did You Know...

That a dentist from Carver, Dr Ebenezer Bray, was elected Representative for his district at the first Minnesota Legislature under its new 1857 – 1858 constitution.

Salt/Sand Storage Building

The council was informed that during the bidding process for the Fire Station/Public Works building the storage building for salt/sand had been removed to save money. Any salt/sand remaining at the end of the season must be removed otherwise it will wash way into the storm sewers. Quotes had been received to construct a storage building for this material. The Public Works Director had budgeted for this structure. Motion was made and carried awarding construction of the storage building to the low bidder.

Irrigation System for Community Park

The Park and Recreation Board reported that they have been working on a Capital Improvement Plan for the parks. The first priority on this Capital Improvement Plan was to complete last year's goal of leveling and seeding the southeast field. The board requested to drill a well, electrical demands and an irrigation system for the Community Park. One council member approved of the idea of a well versus using treated water for irrigation. It was the mayor's opinion that the Public Utilities should construct the well and charge the city for water used. Motion was made and carried to get bids for a well, electrical demand and irrigation system for the Community Park.

LyleWood Glen South

The city engineer told the council that the update of the Heritage Plat has the final plat package ready for review by the Planning Commission. The developer is ready for clearing operations, along with demolition of the existing building. The newest subdivision would be named 'Lylewood Glen'. Tree removal and determination of elimination of which trees was discussed by the council. One council member stated preference that the developer's agreement allow the city to determine trees that should be saved. The consensus of the council was that work should not begin until final plat approval is given. The mayor however reminded the council that the normal procedure allows grading prior to final approval. Suggestion was made to announce interest at the Planning Commission meeting to give notice of the decision. Motion was made and carried directing the staff to research an ordinance for saving trees in new developments.

Heritage Development requested approval from the Planning Commission for the final plat of Lylewood Glen south (formerly Heritage Development, Phase I) consisting of thirty eight acres to include twenty-two single-family units and ninety three town home units. The final plat meets requirements of the Planned Residential Development and is consistent with the preliminary plat and zoning approved in October of 2003. The city planners recommended approval with conditions.

The Planning Commission recommended approval of the final plat of Heritage Development upon meeting the conditions set forth by the city planner, engineer and attorney.

Request was submitted from the Heritage Development for approval of the final plat for LyleWood Glen South consisting of approximately thirty eight acres inclusive of twenty two single family units and ninety three town home units. The final plat meets the requirements of the Planned Residential Development, consistent with the Heritage Development Phase I preliminary plat and the Planned Residential Development zoning. Revisions to the resolution had become necessary. Motion was made and carried adopting the resolution approving the final plat for LyleWood Glen South with revision notations.

Resident expressed concerns regarding the creek adjacent to property. It was the resident's opinion that there should be an easement along the creek in the event there are problems or erosion occurrences. The administrator was directed to follow up on this issue.

The engineer informed the council that in order for grading to begin in this area that a grading plan must be approved. No grading will be allowed in the wetlands and a letter of credit to the city is required prior to issuing a permit. Tree inventory question was also addressed by council member. Work is being done on this issue. The Heritage Developers stated that this would be done before grading is begun.

Recreation Partnership

The council reviewed the drafted agreement for a possible partnership with the City of Chaska for recreation facilities. The basis of the agreement was pro-rated for the first year. The agreement would be negotiable based on membership numbers from the City of Carver thereafter. There would be an opt-out clause annually. The Park and Recreation Board recommended going forward to partner with the City of Chaska Recreational Center. Motion was made and carried approving the agreement with the Chaska Recreation Center.

The city administrator relayed to the council that the City of Chaska council would probably not approve the agreement of the Recreation Agreement if this agreement included the municipal golf course. It was the City of Carver's council consensus that negotiations continue if the Community Center is still an option.

Carver Bluffs 11th Addition

Carver Bluffs developer requested approval from the Planning Commission for the final plat for Carver Bluffs Eleventh Addition consisting of one lot, Outlot, Carver Bluffs 6th Addition and seven lots in Outlot E, as well as Carver Bluffs 7th Addition. This final plat meets requirements of the Planned Residential Development as approved, consistent with Central Preliminary Plat and zoning approved in July of 2000. The city planners recommended approval of the final plat for the eleventh addition with a list of conditions. The Planning Commission recommended approval of the final plat upon meeting conditions specified by the city planner, city engineer and the city attorney.

The council was told that the Planning Commission forwarded the recommendation for approval for the final plat of Carver Bluffs 11th Addition. This plat was for seven homes. Motion was made and carried with all ayes adopting the resolution approving the final plat of seven residential lots for the 11th addition of Carver Bluffs.

First National Bank

The Heritage Preservation Commission reviewed a presentation from the First National Bank of Chaska representative regarding the proposal to temporarily locate in a downtown structure in the historic district. Remodeling plans would be temporary and upon vacation of the building, the structure would be restored to its original status. There would be more discussions in the future as both groups communicate and compromise.

Heritage Preservation Commission

The Heritage Preservation Commission members are reviewing revisions to the Heritage Preservation Commission ordinance so that it better reflects the goals and purpose of the organization. The group decided that it would be best to present a completed version of the updates to the council rather than to submit it in sections. One reason for upgrading the ordinance was to signify more support to the commission.

The organization also discussed changing their meeting dates to better accommodate attendance. Their recommendation was to change the Heritage Preservation Commission meeting from the first Thursday of the month to the third Tuesday of each month. This recommendation will be submitted to the city council for their approval.

The Heritage Preservation Commission discussed the continuance of the practice of placing historical plaques on other historical places as they have done in the past. The organization discussed determination of placement at what sites and funding this project. This topic will be discussed further.

The council approved changing the meeting dates of the Heritage Preservation Commission.

Did You Know...

.....that in 1877 Carver ceased to be a town and became an incorporated village.

Dahlgren Golf Course

The Park and Recreation Committee and Dahlgren Golf Club participated in a joint meeting to talk about a City Golf League. The Dahlgren Golf Course offered an invitation to the City of Carver for a Saturday Golf League. This invitation included 9 holes with a cart on Saturdays from 4 – 5 PM. There would be thirty two openings for eight groups of four at $150 per person for six dates of June 5th and the 19th, July 10th and 24th and August 7th and 21st. One person would be needed to schedule the dates and collect the money. This invitation will be posted on the web site and the city newsletter.

RiverSide Park

The city administrator reported to the Park and Recreation Board that the Fish and Wildlife submitted an appraisal for RiverSide Park. The Park and Recreation Board discussed the future of the park. Motion was made and carried rejecting the offer from the Fish and Wildlife at this time. An invitation should be extended to the Fish an Wildlife representatives to attend a Park and Recreation Board meeting.

Black Sox BaseBall Season

The BaseBall season is fast approaching, as a matter of fact, it is here! The first Exhibition Game will be held on April 24th. The Black Sox will be playing St Boni at the Carver Community Park. Come and watch. Better yet, interested in playing ball, come and sign up. You can contact Paul Reimer at 952) 448-3422. The Black Sox's BaseBall Season officially open May 2nd through July 20th. Then there are the playoffs. Don't miss the fun. Call Paul!

Congratulations

It's a Boy! Vicki and Sean proudly announce the birth of their son, Zachary Alan Johnson born on January 29th 2004 in Waconia . He weighed in at 8 lbs 7 ozs and was 20" long. Vonnie Rademacher and Audraine and Traci Kubista are the excited grandparents of the newborn. Congratulations!

Municipal Utilities

The mayor inquired about why Well #1 was being used and not Well #2. The Public Utilities Director informed the mayor that chemicals are located at Well #1 and not available at Well # 2. And until the treatment plant is completed, Well #2 is for emergency use only. Construction update at the water treatment plant was discussed. The work has stopped. Explanations were given for the delay. Westra Construction has been unable to replace employees from a subsidiary company having financial reconstruction issues. Question was asked about penalties if deadlines were missed. The council was told that substantial completion is to be expected in September or there could be expected penalties. Expectations are to have the water treatment plant completed as scheduled.

Tentative Agenda

Monday Evening 6:30 PM

1) Call To Order
2) Approve Agenda
3) Petitions from Residents
4) Consent Agenda
5) Public Safety
6) Public Works Report
7) City Engineer/Planner Reports
8) Administrative Reports
9) Liaison Reports
10) Other Business
11) Adjourn

Did You Know... that 558 men from Carver County served in the Civil War from 1861 – 1865

Mount Hope Road

The council was reminded that it has been a year since the Public Hearing was held pertaining to the improvements on Mount Hope Road and SkyView Lane, along with utility improvements. Another Public Hearing needs to be scheduled as a part of the Chapter #429 process. Since the last hearing there has been a commitment made by MnDOT for construction on portion of the Mt Hope Road from the Highway #212 and Forner Lane, and Bade Lane as a part of the Highway #212 Design Build project. Mount Hope and SkyView Lane will be one project and affected property owners will be notified.

The council had authorized the feasibility report the engineer reminded. The engineer discussed the Forner Lane utility improvements. MnDOT will be eliminating the access of Bade Lane to be realigned with the new highway. MnDOT proposed reconnecting Bade Lane to Mount Hope Road via Forner Lane. This work would be done in the design build project. The engineer recommended that the municipal utility mains be placed under Forner Lane prior to any street work and then incorporate the utility work into the Mount Hope/SkyView Lane projects. The engineer reviewed costs on the Forner Lane project, assessments and recommended oversized water mains at the city's expense.

Municipal Buildings

The administrator reviewed the final report from the Municipal Buildings Committee with the council. Proposal has been suggested to utilize the former fire station for the municipal utilities and building inspector departments. The council was told that the SteamBoat Committee has considered using the building for activities and possibly eliminating the food tent. The discussion also included the city hall. It was the mayor's opinion that if the city hall were to be moved from its downtown location then the city should be researching suitable site and looking at land options. The administrator pointed out that the committee recommended that the city hall remain in the downtown complex. Motion was made and carried with all ayes affirming agreement with the recommendations of the building committee. Their recommendations were: convert the former fire station to public utilities/building inspection facility; offer the 4th Street City Garage for sale; Lions Park Garage for sole usage by the Park and Recreation Board; appoint a committee to discuss the potential need for future school facility and library drop-off area and get an appraisal on the 4th Street Garage and the city hall remain in the downtown area.

Church-By-The-River

A council member pointed out how impressive the Church-By-The-River appeared when the lights were on at night. The Heritage Preservation Commission requested possibility of the lights being left on for several hours at night. Arrangements would be looked into concerning this request.

Carver Lions

Congratulations to the three new members! Ray Williams, Tim Craig and Chris Nichols have joined the ranks of the Carver Lions to help them get all their good deeds done. Welcome aboard guys!

The purchased new playground equipment for the kids at the Community Park will be installed soon by the Lions. This new equipment is for kids six years old and younger. That should be fun for them!

Are you ready for the Lion's Pork Chop Dinner? On April 23rd at 5 PM until 7 PM you can come to the Village Hall for a Pork Chop Dinner for $7.00 per person. If you want to ensure your seating at the Village Hall, you can purchase tickets in advance from any Carver Lion. You can ask questions or get information from the Carver Depot, Carver Liquor, Harvey's or the City Hall. Hurry, before someone else gets your share.

Disclaimer

The unofficial minutes of city organizations were referenced to formulate the news in the "*Villager Tower*".

US Fish & Wildlife

Linda Malz representing the US Fish & Wildlife gave a presentation and answered questions pertaining to the proposed integrated trail system affecting the City of Carver at the Park and Recreation Board meeting. Presently there are eight units on fourteen thousand acres by the Fish & Wildlife. The organization is presently seeking ways to connect the Chaska unit to the Rapids Lake Unit. The acreage involved is privately owned. Attempts for acquisition are being pursued. At the time acquisition is achieved, the Fish and Wildlife like to construct a new post/rail fence and an 'Interpretive Kiosk" relating the history of the area in the RiverSide Park area. The organization would also like to replace the existing Ash Street bridge. They would also like to see a pedestrian/vehicle access. A Park and Recreation member inquired about a pedestrian crossing behind the levee at the end of Broadway by the Fire Station. The Fish and Wildlife would like to work with the board and discuss this trail system further. She also explained the application for grants and the possibilities for receiving this grant because the trail in Carver would tie into a major regional trail system. These trails were for hiking and biking. Motorized vehicles, horses and snowmobiles were not allowed on these trails. Inquiry was made about Bluff Park. The trail in this area is dependent upon acquisition of private property.

Question was also asked if there could be a path along the river? If cross country skiing was an option? And if this trail would tie into the state trail? The representative stated that there were conditions attached but there was positive response. The trail would Channel along the river from Chaska to Carver and continue south to the County Road #45 River Crossing, tie into the MN State River State Trail and then travel northward on the State Trail completing the trail loop back to Chaska. The board requested to be kept updated on information and hopefully continue to move forward with the plans.

YellowStone Raccoons

The bench that the 4-H group made in memory of 'Bev Swanson' will soon be forthcoming to the Community Park.

The 4-H members made spring favors (door knockers) for the residents of Auburn Manor in Chaska. They are all getting ready with their projects for the fairs too.

Carver Softball/Baseball Youth Association

The registrations have been completed. Games will be starting the beginning of May. You will find teams at the Lions Park field, Community Park fields and the Carver Bluffs field. In June the teams will be playing in East Union. Anyone interested in helping or kids who wish to play contact the city hall for information.

Sponsel's Minnesota Harvest

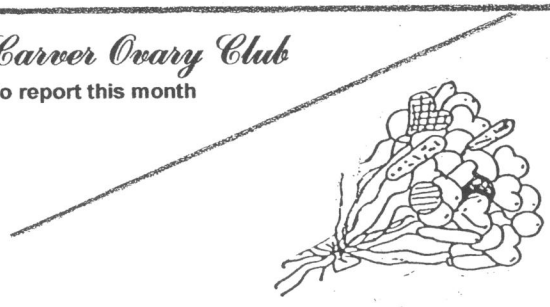

Are you looking for something different to experience? Sponsel's Minnesota Harvest Apple Orchard in Jordan is offering all kinds of different experiences for you to try out.

You can learn about what is being offered visiting the website at www.minnesota harvest.net or if you prefer, just call at 952) 492-2785 or toll free at 800) 662-7753.

Looking for something different on Friday evening....the orchard offers a delicious steak dinner. Be sure to come and check it out.
