Villager Tower

In Honor of the Memory of Susan Thon

In Loving Memory of

Wendy Lee Dauwalter

August 11 1953 -
June 17th 2004

I'm Free

Don't grieve for me, for now I'm free;
I'm following the path God laid for me.
I took His hand when I heard Him call,
I turned my back and left it all.

I could not stay another day to laugh,
To love, to work or play,
Tasks left undone must stay that way,
I found that peace at close of day.

If my parting has left a void,
Then fill it with remembered joy.
A friendship shared, a laugh, a kiss
Ah yes, these things I too will miss.

Be not burdened with times of sorrow,
I wish you the sunshine of tomorrow.
My life's been full, I've savored much,
Good friends, good times,
A loved one's touch.

Perhaps my time seemed all too brief,
Don't lengthen it now with undue grief.
Lift up your hearts and share with me,
God wanted me now, He has set me free.

A blast from the past. From another time zone in our lives. This piece is dedicated to that time in both of our lives to a life long friend whom I must now bid 'goodbye' begrudgingly. We may not have been best friends, but far more than mere acquaintances. Our lives have been linked with one another from the time of our births because of the Mound/Navarre girls who married the Chaska guys. Along with the their offspring. It's a small world as we all intertwine right into now, the third generation.

Little did we know as youths what our futures held for us. Our parents were friends. Then our daughter's became best friends. Just as we claimed Shawn as ours – Wendy claimed our Kim as hers. Wendy was so close to her kids, Shawn and Erin, her mom, Joanie and her sisters, Stacy, Linda and Lori, as well as her sister-in-laws. Usually where you saw Wendy, there was sure to be someone from her family not far behind. Always a smile, always a wave. You could always count on Wendy, Hooker, Shawn, and Erin when you needed a neighborly hand. Even when Wendy joked about Hooker being determined to take out the tree between us when the boat got away. We teased about that tree having to go so that we could both check on each other.

As we grew, our children grew; Hooker and Wendy began to do what every parent dreams of doing once again. And that was to take off and spend the day together alone. They rode motorcycles, they took road trips, and they enjoyed each other. We should all be so lucky!

Goodbye Wendy!

Chamber of Commerce

The Chaska Chamber of Commerce representative extended an invitation to the Carver council to join the chamber. A question was asked that if the City of Carver was to participate then would this be thusly reflected in the name? The process to be pursue for such a chamber to be initiated was reviewed. Web site links would be put into place. The cost for this venture was discussed. A motion to join was put on the table, but tabled after some discussion. The present active local chamber member should be contacted for more information.

The council made a motion and carried with all ayes for the city to join the Chamber of Commerce. A council member asked about the incorporation of Carver into the Chamber. The Chamber has a meeting in May and the City of Carver will be discussed at that time.

Utility Upgrades

The city held a Public Hearing about the utilities improvements on Mt Hope Road and SkyView Lane Streets. The individuals were told that a second Public Hearing was necessary due to time lapse and the necessity to explain changes in the original plans. This project involves Mt Hope Road and Lime Street from County Road #40 to Highway #212. The work involves sanitary sewer, curb, gutter, and storm sewer. This work will be incorporated with the work being done on Forner and Bade Lanes. Temporary easements will be required. SkyView Lane will also be included in this improvement project. Assessment costs will also be associated with this project. The work is estimated to take approximately three and a half months.

Phase I will involve SkyView Lane to Highway #212, Phase II will be Lime Street and Phase III will involve the work on SkyView Lane.

An assessment hearing would tentatively be scheduled for September 2004. Assessment determinations were discussed. The time schedule was questioned. It was hoped to start the work in August. Senior citizen cost reductions were requested, as well as the developer's contribution for some of the work. Assessment calculations for the north and the south side were reviewed. Some assessments would involve street and related improvements but not necessarily assessed for the utilities since they are already in place.

Motion was made and carried with all ayes adopting the resolution ordering improvement and preparations of plans for the Mt Hope Road Street utility improvements. Motion was made and carried with all ayes adopting the resolution approving the plans and specifications ordering advertisement of bids for Mt Hope and SkyView Lane Streets and utilities improvements. Motion was made and carried with all ayes approving the resolution determining the necessity of acquiring interest in properties in conjunction with the Mt Hope Road Improvement project.

The council discussed updates regarding private utilities, easements and costs regarding to the Mt Hope and SkyView Lane Street improvements. The engineer reported that currently the project is being advertised for bids and private utilities are relocating their lines as to avoid Mt Hope Road conflicts. Easement meetings are continuing. The council did not need to take any action at this point in time.

The council opened and reviewed bids received for the street improvement project on Mt Hope and SkyView Lane. Motion was made and carried with all ayes accepting amended resolution accepting additional alternate one. Contract verbage was discussed. A penalty was in place if the project was not completed on time. Change orders could be added, if necessary and the contractor is aware of this fact.

Property negotiations have been achieved for a holding pond for the Mt Hope project. The attorney recommended that the council approve the proposal to purchase the property. Motion was made and carried with all ayes offering the property owner a designated amount of money for approximately one acre of land necessary for reconstruction of Mt Hope Road plus additional square footage to relocate the fence on the property line.

"People are just as happy as they make up their minds to be"

- Abraham Lincoln

Forner Lane Utility Improvements

The Public Hearing for the Forner Lane utilities improvements was opened. The city engineer explained that the portion of the Highway #212 Design Build project by MN DOT would be eliminating the access of Bade Lane which is to be realigned to the existing Highway #212. MN DOT has proposed to reconnect Bade Lane to Mt Hope Road via Forner Lane. This work will be done under the Design Build Project. Since there is not currently any municipal utilities in place it was recommended that prior to street improvements the utilities be constructed. Forner Street is a private street, an agreement must be made to initiate the work. Assessments were discussed. The engineer explained the changes after MN Dot set their plans for the highway improvements. The Public Hearing was to be continued for further discussions.

LyleWood Glen

The engineer informed the council that the developer proposed to fill two wetlands. The WetLand Conservation Act requires the city to receive comments from various agencies and then to take final action on the request. The council was addressed on some concerns. Motion was made and carried with all ayes approving the application of Heritage Development for Wetland filling and mitigation if all of the issues are addressed.

The city planner informed the council of all the steps taken prior for final rezoning of the subdivision by ordinance. Motion was made and carried approving the ordinance rezoning property platted as LyleWood Glen South.

The Planning Commission reviewed proposed revisions to LyleWood Glen South Final Plat. The city planner pointed out first that the name had been changed to just LyleWood Glen. The Homeowner's Documents were reviewed by the Planning Commission. These documents would be in effect after the final plat is approved.

Mention was also made that Heritage Construction would be building the single family dwellings with the same builder. A variety of exteriors were suggested. The company explained that attention needed to be paid to the rolling topography. It was the companies opinion that 'prairie style' design would blend better within the slopes which meant fewer peaks and gables. The company explained that the rear of the homes would be more their focal. The Planning Commission stated preference of variety of exteriors versus continuous similarities. The Planning Commission recommended approval of the revisions to the final plat with the condition that variety would be highlighted in the earthtones as in siding, shingles and stone accents.

The Planning Commission reviewed the revised final plat for approval or denial at their meeting and recommended approval with included changes of name change; town home lots are being split rather than individual subdivisions in the future, building elevations, Centex is no longer the developer, establish design criteria, revise front-yard setback for town homes, revise side yard set back for single family homes, other changes in resolutions as necessary approving amended requests from prior requirements. These were all changes requiring an amended resolution. Motion was made and carried with all ayes adopting the amended resolution approving the final plat for the development of LyleWood Glen.

The mayor pointed out that the developers of LyleWood Glen stated that there were going to be two trees per unit planted. The building inspector stated that a tree inventory has been created and that the developer has volunteered to save trees and in their landscaping plan there will be additional trees added.

Get Well

Brittany Lenzen is still recuperating at HCMC from a car accident. Debbie and Loren hope to be bringing her home soon to continue recuperating. Full recovery is expected from her injuries. They would also like to say thank you to everyone for their prayers, well wishes and help. Please continue your prayers. Visitors are welcomed, both at the hospital and at home.

Paul Schultz is recuperating from gallbladder surgery. Get well Paul.

Sanitation Licenses

The administrator explained that the city ordinance restricts the number of sanitation licenses in Carver to two. Three companies have applied for licenses. Road restrictions were discussed. Charging for recycling services when not used was discussed. Tidy Disposal, Waste Management and Evergreen Sanitation were the three applicants. Evergreen Sanitation explained that they were a new company and the garbage that their company picks up is not taken to a landfill rather their firm takes the product to a facility where it is recycled or disposed of in an incinerator. The representative from the Carver County Environmental Services talked about the importance of recycling. Evergreen Sanitation provides an alternative.

The attorney was to look at the verbage of the ordinance to ensure that the company would be held responsible for overweight violations. Motion was made and carried with all ayes amending the ordinance to increase the number of haulers within the city and require pick up on Thursdays and Fridays. Motion was made and carried with all ayes granting licenses to Waste Management and Tidy Disposal with Evergreen Sanitation scheduled to return to the May council meeting. Motion was made and carried with all ayes retaining the services of Tidy Disposal for city owned sanitation pick up.

The council again discussed the issue of sanitation pick up. The city attorney redrafted the ordinance amending it to state allowing for the issuance of up to three licenses and restricting pick up days. The council made a motion adopting the amended ordinance relating to garbage, refuse and recyclables.

First National Bank

The First National Bank of Chaska is leasing 304 North Broadway for a temporary downtown location. The bank representative met with the Heritage Preservation Commission presenting a plan for approval. The ramp is still a issue. An architect for the bank also attended the meeting presenting a picture of the proposed final project and a detailed architectural site plan. The ramp is shown on the right side of the front of the building. The Heritage Preservation Commission made a motion recommending approval of the revised proposal by the First National Bank of Chaska for remodeling at 304 North Broadway with acknowledgement that the ramp would be a temporary structure.

The bank representative introduced herself to the council. The council reviewed the plans for the ramp at the bank site. The ramp would be temporary and would leave with the business and had been approved by all of the appropriate committees. Motion was made and carried with all ayes approving the alterations to 304 Broadway by the addition of a handicap ramp.

Open Space Requirement

The Planning Commission discussed concerns pertaining to the "open space" requirement. It was their opinion that the city needs to prepare for the future and if the city continues to wait, it may be too late. There is need to preserve more land. Theoretically the capacity is still available. There was discussion of increasing park dedication figures from 0% to 50%. Was 50% too high? The city planner explained that it is difficult to set amounts because defining 'open space' and 'park dedication' are two different issues. Presently the city code does not define this difference either. The city planner also pointed out that 'park dedication' is noted in the city's Comprehensive Plan. Also, the Met Council reviews the Comprehensive Plan examining the amount of "open space' proportion to residential density. The mayor stated his opinion of wanting to see more open space and at the same time creating an environment of more affordable housing. Therefore the Planning Commission could submit recommendations to research the policy of protecting and increasing open space.

The city council was informed of discussions by the Planning Commission regarding increasing the open space provision in the city. Various options had been discussed. The city planner stated that minor amendments could be made to the existing Zoning Ordinance to address the increase figures for open space providing some benefit to developments proposed for short term. More comprehensive amendments would be necessary for the planning and implementing the Comprehensive Plan. The city planner suggested short term placement of additional definitions in the Zoning Ordinance. Motion was made and carried directing the staff to draft definition changes for the Zoning Ordinance for the Planning Commission and the Park and Recreation Board. The council at this point reviewed creating a Tree Replacement Ordinance.

Carver Bluffs – Eleventh

The city planner explained that there was an error concerning the number of lots in the final plat for Carver Bluffs-Eleventh on the original approving resolution which required correction. Motion was made and carried with all ayes approving the final plat for eight residential lots in Carver Bluffs Eleventh Addition for Hans Hagen.

Carver Bluffs West

A Dahlgren Township property owner approached the Planning Commission concerning run-off from Carver Bluffs West. The developer had stated that the run-off would be redirected, but it appears that the slope is higher than originally plotted, therefore there is an issue. The Planning Commission questioned if the volume was changing, or just the slope. Would the slope create enough of a concern because of the velocity? Sufficient erosion control was questioned. The mayor stated that vegetation on the slope would matter also. The city engineer would be checking into this issue.

River Bluff Estates

The city engineer reported that River Bluff Estates may start some work soon.

Water Treatment Plant

The mayor asked about the water treatment plant. The revised completion schedule has not been received. Question was asked about MN Dot not constructing the access road as had been presented to the city. The attorney informed the council that MN Dot plans on using the Old Highway #212 as a frontage road and access. A map has not been received either with revisions from MN Dot. The property is located in Dahlgren Township and the city questioned the developer concerning the change.

Dahlgren Township

The Dahlgren Township Board discussed the required maintenance agreement from MnDot for service roads with dead end as the result of the proposed new #312 highway construction. The board reviewed a new map presented of the Highway #212 plans. The maintenance agreement would consist of mainly removal of snow and ice. A budget could be established for road maintenance over time. Motion was made and carried with the stipulation that this agreement is received in writing.

MnDot

The mayor of Carver and Mr Jon Chiglo from MN Dot addressed the Dahlgren Township Board concerning the access of property with a developer. The board was told that a decision may eliminate the south access once development has begun, but the north access would remain for residents to access the Highway.

The engineer discussed access to the property on Highway #212. The goal of the design was to create access to the property. The council reviewed three scenarios considered by MNDot. Council member stated his concern that the final access had not been presented to the council before the decision had been made. It was this council member's opinion that the final lay out worked well, but was concerned that changes were made after municipal consent had been given. The mayor pointed out that the road is in the township. The council member stated awareness of this fact, but the area had been included in the municipal consent request.

Fire Department

The Fire Department personnel were asked if the department had moved into their new building. The chief responded that most of the items were moved. The mayor inquired about an official ribbon cutting ceremony. The appropriate personnel were to orchestrate and schedule an official ribbon cutting ceremony.

Tollefson Development

The representative from Tollefson Development was at the Dahlgren Township Board meeting to speak on the Alternative Urban Area Review process. The proposal has the City of Carver as the Responsible Governmental Unit overseeing the Alternative Urban Area Review process. A similar study done in Cologne was presented to the board for their review. The mayor was asked if they had any plans of annexing any of his property in the next couple of years or if they had even looked that far down the road for this developer? The response given was that this would be the decision of the developer. The mayor stated that they would not annex anything until they needed it. The city planner stated that background work had begun on the Comprehensive Plan. A meeting should be scheduled soon. Motion was made agreeing to sign the Alternative Urban Area Review process with the exception of the "Whereas", if the property were to be developed, it would need to be annexed to the City of Carver. The township clerk was directed to draft a new contract for the city.

Matthew Weiland representing Tollefson Development stated that his purpose for attending the Planning Commission meeting was to introduce the "Vision" being considered for the City of Carver and finding the best use for the land available. He informed the Planning Commission that approximately 900 acres has been secured for their proposal. He further pointed out that a "master plan" may include items such as transportation, commercial possibilities, academic possibilities, maybe a community center, even a possibility of senior citizen housing. Tollefson would like to offer everything from 'starter homes' to executive housing'. The needs and goals of the City of Carver would be addressed. There was a lengthy discussion with questions and answers. One commissioner requested an on-site tour of the area.

"Funky Minds"

Diane Vollum representing "Funky Minds" met with the Park and Recreation Board asking for a partnership with them in their proposal. "Funky Minds" has received a grant from the Greater Minneapolis Council of Churches. "Funky Minds" is looking to initiate a program called "School Success Program". This program is designed to provide additional help in a variety of subjects. It was the hope of "Funky Minds" to "partner" with the Park and Recreation Board to coordinate a summer program, especially geared toward middle-school children involving outdoor activities, such as tennis, etc or perhaps in-door activities, such as computer type programs. Question was asked if this proposal extended beyond the summer months. It was their goal to investigate different avenues and opportunities. The age group being targeted was emphasized on the middle-school age children. Initial responses have all been positive. Question was asked that since this was a grant would the city actually be allowed to partner? This would be checked. It was explained that the main focus of the Park and Recreation Board was to set up the infrastructure for those who would then continue forward independently with developing such programs. The Park and Recreation Board thanked and encouraged "Funky Minds" for their efforts and programs.

The council received an update on the Creative Education Center. The center received a grant and is working with the School District to further develop the program. They are a 501 c, non-profit organization. A young man asked the council about using the old fire station for outdoor games. Use of the Village Hall gym is available.

Park and Recreation Board

The Park and Recreation Board reviewed photos and discussions regarding acquiring a caboose for the City of Carver. The cost of the caboose was reviewed, along with hidden costs such as delivery fee and restoration costs. There was discussion about where and how to set it. A book was presented on effective uses of cabooses. The board members were thanked for their time and efforts. Motion was made, but tabled upon further discussion. It was decided to pursue other possibilities prior to placing a down payment.

All really need is love, but a little chocolate now and then doesn't hurt!"

Carver Creek – 8th Addition

The city planner gave a description of the request for the proposed final plat and construction plans for Carver Creek 8th Addition to the Planning Commission. This plat involved the next phase of the Carver Creek development containing twenty nine single family homes, Outlot A and right of way for Riesgraf Road.

A Conditional Use Permit will be necessary for the grading plan proposed in the bluff setback of some lots. The city planner recommended approval with conditions. The city engineer explained that Carver Creek 8th Addition will complete the construction of streets and utilities along Riesgraf Road. Concern was expressed by a commissioner regarding erosion. The city planner pointed out that if the Conditional Use Permit were denied there would then be the need to redesign. The Planning Commission queried building decks, pond issues, pond maintenance and proposed trails. Request was submitted to coordinate an on-site tour to preview the area with both the Planning Commission and the Park and Recreation Board. Motion was made and carried with all ayes recommending approval of the proposed final plan and construction plans for Carver Creek 8th Addition with conditions set met by appropriate personnel.

Carver Lions

The Carver Lions held elections for the 2004-2005 year. They have elected their officers for the upcoming year. They are as follows:

President – Keith Wickenhauser
First Vice President - Gary Marquardt
Second Vice President – Randy Hulstrom
Third Vice President - Mark Bartusch
Treasurer – Marvin Grimm
Secretary - Cheryl Peterson

During the months of June, July and August, the Lions will only meet the first Wednesday of the month. The most recent activities that the Lions have been keeping busy with was that they served the Tea and Lunch for the Red Hatters who came to the Garden Tour and Tea Party at the Church by the River. The Lions also made sure that the fence was erected at the church site. The Gazebo in the city park has seats which were made and installed by the Lions. Now the Lions are working on the Rod Iron Fence from the Mount Hope Cemetery. They are cleaning and refinishing it to be put back in place when the Mt Hope Project is completed. Remember, if you are interested in learning more about the Lions or joining, come to their meeting and see what they are all about.

Carver Fun Run

The report given was that this is the 7th year for participation in the Carver Fun Run. The Silver Bullet, Lisa's Place and Harvey's all sponsor the Juvenile Diabetes Send-a-Kid-to-Camp Fun Run. The money raised from this event is set aside for a camp scholarship for youngsters to go to camp. Over the yeas, this event has achieved sending one hundred fifty eight kids to camp who otherwise would not have been able to go. This year at the Fun Run there were three hundred plus bikes who participated in this May Fun Run. The event raised $15,500. to donate to the American Juvenile Diabetes Association for the camp scholarship.

Congratulations and thanks to everyone who participated are extended from the sponsoring tavern personnel.

Public Apology

First of all, the "*Villager Tower*" apologizes for the long delay in getting this newsletter to ya'll. I have had major, major computer problems!! We have been working feverishly to correct this problem as quickly as we could. Donations are welcomed for anyone wishing to contribute to the 'computer replacement fund'. The printer also went kaphooley after the last publication as well. So it's been a real "issue" in this household. So once again, I sincerely apologize for the huge delay in publication. Again, anyone wishing to contribute to a 'computer replacement fund', you won't be turned away. Thanks for your understanding and patience!

Ricki Yvonne

Editor

Carver Ovary Club

On June 19th the Ovary Club hosted a Garden Tour & Tea Party for the Red Hat Society from around the metro area to promote the historic downtown of Carver. There were eighty one scheduled Red Hatters to attend the festivities. All proceeds from this event will be donated back into the community.

The red hatters were greeted by artists in each garden. They witnessed water color, photography, oils, acrylics and pottery. And then there was the master gardener demonstrating. Lunch was served at Church-By-The-River.

38th Annual SoftBall Tournament

The Carver Fire Department once again sponsors the 38th Annual (Men's & Women's) SoftBall Tournament. The tournament is scheduled for July 9th, 10th and 11th. Most of the activities can be found at the Community Park area. All the proceeds will be used for new equipment for the Fire Department. If you are interested in entering a team, contact Dave at 952) 221-9471 or the city hall.

Variance Request

The council received an application for a variance from the bluff set back to construct a deck . The information was incomplete for any action to be taken. The variance request was discussed. The house was built to accommodate a deck, however, the house is 35' from the bluff and the requirement is a 50' set back. The city planner is requiring a survey. The council reviewed photos of the site. One council member commented that due to the circumstances a variance could be allowed. The attorney stated that the council needed to uphold its ordinances. The criteria was outlined in the Zoning Ordinance and the property owner has not met the necessary criteria to be granted a variance. The staff was directed to seek alternative solutions.

Liquor License

Lisa's Place requested consideration for operating business in an outdoor patio during the summer months. The hours of operation proposed were 10 AM to 10 PM. Proposed plans were presented to the council. The attorney stated that licensing is for the premises and an outdoor patio issue required addressing prior to license approval. The affected neighbors had been contacted. Outdoor hours were asked about. Outdoor music was not on the agenda for the outdoor patio. The council reviewed the proposed resolution. A kick-out panel would be required, no outdoor music and extended evening hours during Steam Boat Days and the fence shall be fifteen feet from the road would all be added to the resolution. Motion was made and carried approving the liquor license for Lisa's Place with an outdoor patio.

When you understand one Thing through and through, You understand everything.

National Registry Plaques

By: John VonWalter

The City of Carver and the Carver Heritage Preservation Commission are again moving forward with the installation of more National Register of Historical Places plaques on historic buildings in Carver's Historic District. In 1980 Carver's Historic District was the first Nationally Registered Historic District to be created in Minnesota. There are about ninety historic dwellings, businesses and structures listed on the National Registry in Carver. The National Trust for Historic Preservation has stated that one of the most important things that can be done to protect and identify a historical structure or district is to install historical marker plaques.

A year or two ago a first phase obtained and installed historic plaques for many of the Carver businesses on Broadway. The second phase in June installed plaques on eleven residences in the Historic District, as well as the Church By The River. A third approved phase will (about August) be marking ten more of Carver's historic buildings, including churches, a business, two City of Carver owned properties and more residences, the histories of which are well defined and have exteriors in good condition. When the third phase is completed, about one third of the Carver Historic District's historical structures will have been marked with plaques.

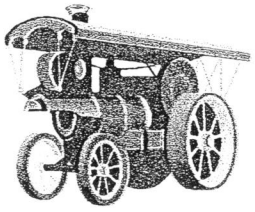

Th Carver Historic District is roughly bounded by Main Street, Lime Street, Walnut Street, and Sixth Street, and includes Carver historic buildings dating from Territorial Minnesota in the 1850's to the 1920's. Carver was then a busy commercial river town that served as a doorway for immigrants and farmers flooding into east central Minnesota.

Anyone with questions about a historic home or building in the Carver Historic District, or who is interested in learning about the history of their building, its early owners, or obtaining a plaque for a Historic District structure, can contact the Heritage Preservation Commission (HPC) or Diane Perry at City Hall (952) 448-5353) for assistance.
