Lost

Need your help. I have lost my precious dog. While away on vacation the dog decided to run away from my daughter. If anyone has seen this dog, please, please call me, desperately trying to find him. He is a fourteen year old Pomeranian male. He is black with a gold nape, gold feet and has the infamous raccoon's bandit mask. He is loveable, friendly, and has kidney issues. He took off from her in the West Union area. I miss him very much and would like to bring him home. If you know someone who has picked up a dog or have seen him, please call Ricki at 952) 448-5126. Leave a message if no one is available.

Carver Village Open Air Market

The Carver's Women's Business Group proudly presents the Carver Village Open Air Market event of the 2007 year. At the Gazebo Park in downtown Carver on Saturday, September 22nd from 10 AM to 3 PM in the park. You will be able to see antiques, vintage goods, artists, farmer's produce, homemade foods and lots of other good things. Circle the date on all of your calendars so you won't forget to come down to the Gazebo Park and check this out for the last time. Purchase is not mandatory, but the ladies guarantee you will want something that appeals to you, even if it is only a big juicy red apple, or nice plump peach. Come on down, check it out, at least. For more information, call 952) 292-8479. Come support his downtown event!

SteamBoat Days Car Show

NAPA Auto & Truck Parts of Chaska presents the Sixth Annual SteamBoat Days Car Show and Swap Meet on September 8th 2007 in downtown Carver from 11 AM to 3PM. This show always has something special to offer. Be sure to come. Looking for information regarding the Swap Meet, contact Butch Krohn at 952) 361-5500.

Municipal Utilities

The superintendent discussed erecting signs to inform residents of watering restrictions. Odd/even water restrictions year round were questioned. Keeping the rule simple was considered a good plan. The signs at the entrances of the city limits were preferred. Pricing would be re-searched for these signs.

The engineer told the council that in order to continue proceeding with construction of the new well, approval is necessary to proceed with plans and specifications, authorization to advertise for bids and to schedule a bid date. Motion was made and carried approving the plans and specifications for the well with all ayes. Motion was also made and carried with all ayes authorizing advertisement and bid date for the well.

The Public Utilities supervisor informed that council that the Water Department is pumping an average of 900,000 gallons a day The maximum the system can handle is one million gallons. Therefore, the water sys-tem is keeping up. HOWEVER, it could become critical if there were a fire or another type of emergency Citizens need to understand these facts. It is not necessary to water lawns every other day which is considered excessive in the council's opinion.

The council was informed of the necessity for an all weather access road to the new water tower location. Quotes had been solicited and received. Costs were part of the budget in the water connection fund. Motion was made and carried with all ayes awarding the project to construct an access road to the low bidder at said amount.

Metropolitan Council Environmental Services

The city engineer requested scheduling a Public Hearing to adopt the resolution for the proposed improvement s for the Metropolitan Council Environmental Services Interceptor. The Public Hearing was scheduled for the interceptor projects by motion.

The council reviewed the engineer's report for the interceptor. The Metropolitan Council Environmental Services interceptor alignment and the Heritage Preservation Commission concerns were asked about. The engineer is waiting for the Metropolitan Council to respond. Indication was pointed out that the route indicated in the proposal requires special attention. The council reviewed and discussed the Metropolitan Council Environmental Services construction cooperation agreement. Motion was made and carried with all ayes approving the Construction Cooperation Agreement with the Metropolitan Council.

The engineer explained the assessment process and projects that could be completed at the same time as the installation of the interceptor at the Public Hearing held. In some areas assessments don't apply but the notices were sent because work will be done and a hearing was necessary to inform property owners. Question was asked about the time schedule of the assessments. Previous assessments schedules were for ten years. Question was asked about the type of system to be expected. The response was that all septic systems will be removed and it will no longer be a gray water system. Were there plans to widen County Road #40 was asked, and would people lose their front yards. Property lines would be considered when the work is planned. The council was reminded that the Third Street Bridge is on the National Historic Register. Grants may be available for work completed in the historic district. Trees being damaged were also discussed. Damage to existing structures and parking losses were reviewed. Motion was made and carried with all ayes continuing the Public Hearing until September.

The council also discussed forming a streetscape committee. Four volunteered to serve on this committee. The council appointed Council members Williams and Peterson, Peter Thiesfeld and Charles Howard to the newly formed committee. The council discussed scheduling meeting dates. Motion was made and carried approving forming a committee to research streetscape improvements.

Remember the three 'R's':
Respect for Self;
Respect for others; and
Responsibility for all your actions

Commercial Rehabilitation Loan Program

The council discussed amending and restating the section of the city code relating to the Commercial Rehabilitation Loan Program. The attorney reminded the council that this item was referred back to the Heritage Preservation Commission whose recommendation for the loan program remained steadfast that the money be available for the Downtown Commercial Projects, exteriors only, Central Business District only, and no residential. The Heritage Preservation Commission's consensus was that it was appropriate for commercial exteriors and expansion to residential in the future. The council was in disagreement. It was felt that the funds should also be made available to the residential structures. The council was reminded that the purpose of the program was intended for commercial uses to revitalize the downtown district. Comment was submitted that if in one year, commercial properties do not apply for the loans, and then the funds should possibly be opened to residential structures. Motion was made and carried with three ayes and two nays approving the rehabilitation loan program be honored for commercial properties as recommended by the Heritage Preservation Commission for one year.

Motion was made and carried with four ayes and one nay adopting the ordinance amending and restating the ordinance involving the Commercial Rehabilitation Loan Program.

Highway #41

The administrator informed the council that the Highway #41 Committee is made up of four cities having met as a committee for the first time in the end of June. Their mission is to potentially unite and show unification on one aspect of the Hwy #41 project alignment. The council was requested to schedule a work session to discuss this project and representation of the committee. Their goal is to decide on one crossing for legislation. Four more meetings are scheduled. Suggestion was submitted that two representatives attend these committee meetings, the mayor and a council member. Suggestion was also made to invite the Louisville Town Board Chair to future meetings. A summary of their meeting was given. The purpose of the committee is to arbitrate the best possible placement of the bridge.

The city planner explained to the Planning Commission the proposal for the new MN River crossing connecting US #169, Scott County, to the new US Highway#212 north of the existing highway corridor in Carver County and the potential impact on the City of Carver . MN DOT proposes planning the process of selecting a preferred alternative by fall of this year.

At a work session attended by the council discussions and explanations were reviewed regarding the proposed Trunk Highway #41 overpass. The city planner distributed maps, reviewed the information involving proposed alignments, DNR lands, the impacts to properties and the cost of the construction. Some other issues discussed were the noise, lights from cars and streetlights that were concerns. The attorney interjected that taking a stand on this issue is difficult since not all of the information is available yet and changes could still occur to routes.

The council discussed the summarized findings of the review of the drafted Environmental Impact Statement. There were two alignments that were discussed that were of concern to the city.

Comments on the drafted Environmental Impact Statement were due to be submitted to MN DOT. Recommendation was submitted for the city to not take a position on a preferred alternative. There was not enough information available to endorse one of the routes presently.

Community Development Authority

The Executive Director from the Carver County Community Development Authority presented the administrator with housing study information for distribution to the council and other interested individuals. A prediction has been made that Carver will have strong growth, primarily single family owned homes. Statement was also made that there will be a demand for affordable housing, as well as senior housing being a necessity.

The pessimist complains about the wind – the optimist expects it to change. The realist adjusts the sails.

Levee Funding Certification

The council discussed the Chamber's resolution for assistance on the Levee Funding Certification. The administrator told the council that the chamber requested council support of federal funding for the Levee Certification Study. It was one council member's opinion that there were too many blanks in the resolution for complete understanding of the resolution. The administrator explained what should go in the blanks and that the council could complete the blanks. Motion was made and carried with all ayes extending thanks and support for the resolution of federal funding for the Levee Certification Study.

The fact was stated that certification of the levee would remove the downtown area of Carver from the regulatory flood zone. The council reviewed the motion to adopt the resolution requesting a Feasibility Study Levee Improvement. Motions were made with all ayes adopting the resolution requesting the feasibility sturdy for levee improvements and authorization forwarding letter to the Corps of Engineers.

The DownTown Task Force discussed the upgrade of the levee with the conclusion that major marketing is required to be done for the city. Suggestions on how to accomplish this will be presented to the council in the future.

Xcel Energy

The engineer informed the council regarding the updated information for burying the power lines by Xcel Energy. The cost was discussed for the location on County Road #11. The attorney discussed the scope and difficulties involved with action. Negotiating costs with Xcel was also talked about. A final decision would be made at a later date.

Centex proposal for burying overhead power lines at Spring Creek and Glen at Spring Creek plats per the agreement with the city is proceeding. Design and cost estimates are completed. The payment process had three options. The administrator recommended interdepartmental loan for payment next year. It was his opinion that the year 2008 would be a difficult budget year. Motion was made and carried with all ayes approving transfer of loan funds, not to exceed said amount from an Enterprise Fun to the General Fund to bury overhead electric lines.

Carver County Sheriff's Department

The council reviewed the policing services contract update. The Sheriff thanked the city for the opportunity to police and protect the city. The contract policing proposal recommended changes and upgrades to services. One council member favored the additional half an officer and remain with the task force program. The mayor stated that the one item that could prevent this in 2008 would be the difficult financial budget year.

T-Mobile Conditional Use Permit

The Park and Recreation Board were informed by the city planner of the application from T-Mobile for a Conditional Use Permit for proposed construction, operations and maintenance of monopole/ communications facility at the Lion's Park. The emergency siren located at the park is scheduled to be relocated. The proposal was explained to the board. The responsibility of the access road would be T-Mobile. They have proposed a Class 5 access road. Preference however, would be a blacktop road consistent with other roads and parking lots in the city's parks. The board was in agreement of uniformity throughout the city. The communications pole is not located within the historic district, however visible from various locations throughout the historic district. Other sites within the city had been researched and the best site is the chosen site. The fence issue was addressed. A fence had been purchased, just not installed at this time. The communications pole could accommodate up to four companies it was surmised. Zoning at this time has not been reviewed.

Proposed City Hall

The City Hall Task Force submitted their recommendation to the council for the proposed new city hall. One option investigated and submitted was conversion of the Old School House, another was the wastewater treatment site.

Miscellaneous

Reminder was given to the council of approval for the construction of a SkatePark in the Community Park. Quotes had been received and were reviewed. Motion was made and carried with all ayes approving the quote.

The city engineer stated that the council needed to adopt the revised resolution for Downtown Street and Utility Improvements. Motion was made and carried with all ayes adopting the resolution scheduling a hearing on improvement of downtown utility and street improvements.

The council reviewed seal coat quotes for 2007. Motion was made and carried with all ayes awarding seal quotes projects to Pearson Brothers, Inc at stated costs.

Trails in subdivisions have been discussed with the council. The Park and Recreation Board should discuss the issue. The Park and Recreation Board have expressed concerns regarding connections with new and old trails.

The Park and Recreation Board discussed ideas and uses for the city owned property on Third Street and Oak Street. The issues relating to the ball fields, Carver Youth Baseball/ Softball Association items, equipment, storage, and purchases were all reviewed extensively. The board also discussed necessary updates for parks. It was concluded that the boards needs to review the entire trail system and the portions of the Comprehensive Plan involving the trail systems. The Board stated their dislike for lacking in the trail system. The board would like to ensure that the trails connect with other trails.

The council was given a brief overview of the preliminary 2008 budget. The administrator reminded the council that Local Government Aid has been reduced.

The council reviewed the Historic Resource Survey that had been prepared by the 106 Group. The council was told by the city planner of the necessity to close this project for the purposes of the Certified Local Government grant by the end of August. Subject to the recommendations of the Heritage Preservation Commission and State Historic Preservation Office.

The council is asked to accept this report. The council discussed the report. Motion was made and carried with all ayes accepting the survey subject to the recommendation of the Heritage Preservation Commission and State Historic Preservation Office. The city planner further requested authorization to execute any necessary form and documentation completion to close out the project and request reimbursement for the project funds expended from State Historic Preservation Office. Motion was made and carried with all ayes authorizing the staff to execute any necessary forms and complete documentation closing out the project and request reimbursement for the project funds expended.

Disclaimer

The 'unapproved' minutes of the council and the township have been referenced for the purposes of reporting news in the "*Villager Tower*" and creating the contents of this newsletter for the purpose of informing residents in the City of Carver and the townships surrounding the city.

Township Town Hall

The township discussed possible land purchase for construction of town hall with property owner. Board members asked questions regarding purchase of property. Proposal presented involved removal of structure from the property and sell lot to the township. Decision was made to pursue the issue at the Annual Township Meeting or possible availability of another property.

Athletic Director

The Park and Recreation Board recommended a candidate for the Athletic Director Full-time position. The part-time position is no longer budgeted for and should be eliminated. Ms Finkel was thanked for her work and appreciation was expressed. Motion was made and carried with all ayes eliminating the part-time position of the athletic director position.
Motion was made and carried with all ayes, amending the Athletic Director job description to Park and Recreation Supervisor. The drafted job description was presented to the council for approval. Motion was made and carried with all ayes approving the job description for the Park and Recreation Supervisor.

Comprehensive Plan Draft

The Planning Commission held a Public Hearing regarding the drafted Comprehensive Plan. The city planner explained the Community Background section of the Comprehensive Plan. She further emphasized that in ten years reviewing and updating will be again required. Housing inventory within the city is always outdated because it changes so quickly. Request could be made to the council if the Planning Commission wished to review prior to final approvals. The Draft Surface Water Management Plan was discussed at length. Another area of the draft reviewed was the Sanitary Sewer Plan. The Planning Commission members commended a job well done. Mention was made to visit Wayzata where they have developments to fit the landscape instead of changing the landscape to fit the developments. Request was also submitted to make the Comprehensive Plan available on the city's website which is being worked on.

LyleWood Glen / First Addition

The Heritage Development, developer of the LyleWood Glen, first addition, is preparing finalization of the punch list items on the plat Upon completion and prior to final acceptance the city's policy requires a two year warranty bond in the amount of the original construction costs. Warranty bond submitted then the city reduces the letter of credit on the plat and accepts the improvements. The developer stated that most cities do not require a 100% warranty bond. This was understood pertaining to municipal utilities infrastructures, but the streets during construction take a beating. The attorney stated that this bond could in done in two parts, one for the utilities and one for the streets. The engineeer and the attorney were to draft a recommendation concerning this issue.

Did You Know...

....that on April 18, 1870 Swedish immigrants William Zittenberg, age 12, his sister Anna, age 10, and another married sister drowned at Carver.

DownTown Task Force

The DownTown Task Force has reached a point requesting council feedback. The committee has reviewed a number of ideas. Certification of the Levee and continued active support by the council for the certification. The council is requested to authorize feasibility studies on river projects identified by the task force as Initiation Projects. The task force's opinion that in the future the existing City Hall and Public Utilities buildings could be utilized for potential retail or commercial spaces. Monument placements of city logo authorizing placement at developments and research the three entries into the city for monuments. The city hall relocation, requesting contracting marketing consultant services and making Carver an event town. Funding these projects was a concern. Collating this list with a former list and to prioritize was suggested. Request was voiced that proposals be looked at and consultants submit estimates on costs of items listed. The engineer would check on feasibility study costs. It was the committee's opinion that Carver's best asset is the riverfront and this should be taken advantage of and marketed to its fullest capability.

Carver Creek Addition

Orrin Thompson requested acceptance for the following phases of Carver Creek and a reduction in Letters of Credits. The Letter of Credit involved the early phases of the plat, Carver Creek First and Third. Question was asked how these phases could be finished for five years and still have punch list items. The engineer explained that some of the earlier phases tie into some of the later phases. Motion was made and carried with all ayes accepting the improvements on Carver Creek and Carver Creek Third and reduce the Letters of Credits. A Warranty Bond was not required since the streets and utilities have been in service for a number of years.

Tentative Agenda

City of Carver Council
Monday Evening 6:30 PM

1) Call to Order
2) Pledge of Allegiance
3) Approve Agenda

6) Municipal Utilities Report
7) Building Inspector Report
8) City Planner Report
9) City Engineer Report
10) City Attorney Report
11) Administrator Report
12) Liaison Reports
13) Other Business
14) Adjourn

Did You Know...

....that in 1882 Carver had three doctors, one lawyer, a real estate and loan office, a flour mill, a grain elevator, six general stores, a carding and feed mill, two drug stores, two brick yards, two hardware stores, two lumber yards, one grocery, one brewery, two watch makers, two carriage makers, one photographer, two harness makers, one tailor, one veterinary surgeon, two boot and shoemakers, one milliner, one bakery, five saloons, and two hotels.

Christy's Bluff

The Planning Commission held a Public Hearing regarding Christy's Bluff. The city planner explained the two parts to the amendment for the development from public use to low density residential use and to ex-tended urban services to several other properties in the area for the Comprehensive Plan. The public use involved potential expansion of the Mt Hope Cemetery.

The city planner presented an overview to the Planning Commission for the Christy's Bluff proposed development. The first three steps involved rezoning of the property from agricultural, planned residential district and the preliminary plat. Recommendation had been submitted to table the issues until it has been reviewed on the revised plans submitted by the developer. The bio-retention island design was not typically acceptable t o the public works or Fire Department personnel was explained by the city planner. The proposal was dissected by the Planning Commission. The proposed trail was discussed Other issues addressed involved lot sizes, blending with existing neighborhood, petition, and the bluff ordinance. Explanation was given of Metropolitan Council requirements involving housing density. The Planning Commission was told that Carver is changing. One of the difficulties with this development foreseen is that the preliminary plan is very different from the original concept plan proposed, but fairness is required to meet the city's requirements.

One petitioner stated that the original plans possibly could have been adhered to, if variables were conducted. One variable involving the city's granting of a variance on a few lots would have allowed the blending into the existing neighborhood possible. It was also stated that it was very disturbing that the petition had not been passed on to the Planning Commission for review. The city planner explained that from memory the variance was not proposed because the proposal needed to meet certain requirements and standards of hardship in order for the request to be granted. Therefore, the developer applied for a Planned Residential Districts. Request was made for the city to consider granting a variance for this development. The Planned Residential District requirements for open space were questioned. The requested number of lots desired left no available open space. The standard subdivision did not require open space as was listed in the original plan. However, when the city and MN DOT captured more property from proposed the development, it forced changes in the original developing plans. The hardship of taking more land was explained. Therefore the recommendation was made applying for planned residential district because the development would not meet the variance requirements. The original plans were reviewed by the Planning Commission. The plans were not as detailed. The four lots requesting the variances were reviewed. The developer pointed out that since the process for the planned residential district was already underway it was too late to change. Changing the total number of lots to accommodate wider lots was questioned. The community has to have enough available affordable housing requiring the city to have higher density. Explanation was given that the developer is proposing a development and governmental units cannot control what type of development is built, only that the city's guidelines are within all of the requirements. Intent was to clarify the reasoning for the events that had occurred.

The council was informed by the city planner that request was being submitted to approve or deny the Comprehensive Plan Amendment for Christy's Bluff for properties on the north and east side of Bade Lane. The amendment involves extending the urban services are to include property proposed to be developed. Included in this activity is the Highway #212 Design/Build Project, MN Dot reconstructing part of the local road network and the city placing municipal utilities in these streets prior to MN Dot's reconstruction. Existing unsewered homes are included with this amendment for future connection abilities. The Planning Commission recommended approval subject to the city planner's conditions. Motion was made and carried with all ayes approving the resolution amending the Comprehensive Plan extending urban services to several properties subject to conditions in place.

Carver's Women's Business Group

It's time to start planning and thinking about the Carver Village Christmas Celebration which is scheduled for December 1st this year. Santa will once again arrive by fire truck and greet the kids. Then there is the Taste of Christmas event at the the Church-By-The-River in the evening for hors de vours and beverages. Don't forget the Silent Auction. This event is a fund raiser for the beautification efforts for Depot Park. Need tickets, want to help, call Linda at 612) 987-5454.

Carver / Preserve America Community

Congratulations Carver! Carver has received designation as a *Preserve America Community*. Carver is the first community in Carver County to become a *Preserve America Community*, and only the eighth to be named in Minnesota.

In August the citizens of the City of Carver received a letter from the White House signed by First Lady Laura Bush, congratulating Carver on receiving designation as a *Preserve America Community*. Carver is the first community in Carver County to become a *Preserve America Community*, and only the eighth to be named in Minnesota.

The First Lady's letter states, in part, "The preservation and enjoyment of your historical and cultural resources celebrate an important part of our nation's heritage. You honor our nation's past and inspire and educate for the future. President Bush and I applaud your achievement. As your community shares its story with residents and visitors, you set a great example for others."

Benefits of *Preserve America* designation include White House recognition, eligibility to apply for *Preserve America* grants, a certificate of recognition, *Preserve America Community* road sign, authorization to use the *Preserve America* logo on signs, flags, banners and promotional materials, listing in a Web-based *Preserve America Community* directory, inclusion in national and regional press releases, official notification of designation to state tourism offices and visitors bureaus, an enhanced community visibility and pride.

Carver was founded in 1852 in the Minnesota Territory, three years before the creation of Carver County. It was platted in 1857, the year before Minnesota became a state, and became the county's first town in 1877. During the steamboat and early railroad eras, Carver was a vibrant commercial Minnesota River town that served as a vital doorway for pioneer and immigrant settlers in the Minnesota River Valley and in western and southwestern Minnesota. With the decline of the steamboat, the decline of the railroads, Prohibition, the Great Depression, and the Great Flood of 1965, Carver fell into a decades-long period of economic stagnation.

Though depressed, many of Carver's early buildings survived largely intact, and the town is seeing a rebirth as historic buildings are purchased and restored. In 1980 the Carver Historic District was created and placed on both the National Register of Historic Places and the Minnesota Register of Historic Places. In 1989 the City of Carver created a Heritage Preservation Commission, appointed by the city council, to help guide renovations and restorations in the Carver Historic District.
Other communities in Minnesota that have been designated *Preserve America Communities* are Wabasha, Stillwater, St. Cloud, Red Wing, New Ulm, Minneapolis, and Little Falls.

Fire Department

The Carver Fire Department would like to invite you personally to be sure to come to SteamBoat Days and be sure to check out the Carver Fire & Rescue Safety Trailer. The department is also actively recruiting members at this time. Now might be a great time to ask questions and/or watch some of what the personnel participate with besides fire and rescue. You are asked to also to check out the "kiddie water fights" in downtown Carver during the regular Water Fights intermission. All kids are welcome to participate.

Annual Bazaar

The Trinity Lutheran Church is having their Annual Bazaar again this year at SteamBoat Days. Be sure to come Saturday, September 8th between 10 AM and 5 PM, then on Sunday from 11 AM until 3 PM. Lunch will also be served. You can have a Sloppy Joe or two or a hot dog or a Taco in a Bag along with chips, beverages and choice of dessert between homemade pie, ice cream or a sundae. Before or after you have lunch you can check out their Bake Sale, Garden Produce, Canned Goods, Antiques, Gently Used Jewelry and Books, Individual Greeting Cards, Miscellaneous Household Items and check out the Silent Auction. See You There!

Welcome Neighbor!

Submitted by Linda Schutz
If you are new to the Carver area and would like a visit from Welcome Neighbor, please call me! I will be more than happy to meet with you to help familiarize you with the area. You will also receive a packet of information containing civic information and many, many gift certificates from area businesses! This is over a $400. value! This is a free service! Please call Linda Schutz 612) 987-5454.

Carver Quilt and Craft Club

Now that school has started and all the summer events are calming down the Carver Quilt and Craft Club will resume their craft night. October 6th from 10 AM to 4 PM in the lower level of the Village Hall. Bring your project and oh yea, don't forget, bring your lunch too and if you want, bring a friend. We are doing scrap-booking, beading, quilting, needlework, whatever your project is, that's what we are doing. Join in with the group and have lots and lots of fun with the others while we all work on our projects. Sound fun? Then come on, load it up and get it down to the hall. Call Linda Schutz at 612) 987-5454 for more details.

Carver Lions

Submitted by Linda Schutz

News from the Lion's Den. This has been a busy summer for the Carver Lions! On one of the hottest days this summer, the Lions hosted a picnic and softball game for the Lions International Youth Exchange Program. Over twenty five adults from fifteen countries arrived by bus coach to enjoy an American Picnic and play softball for the first time in their lives.

On another one of the hottest days of summer: a large number of Carver Lions volunteered to put down a thick bed of mulch in the kids playground at the Southern Valley Alliance for Battered Women facility in Belle Plaine.

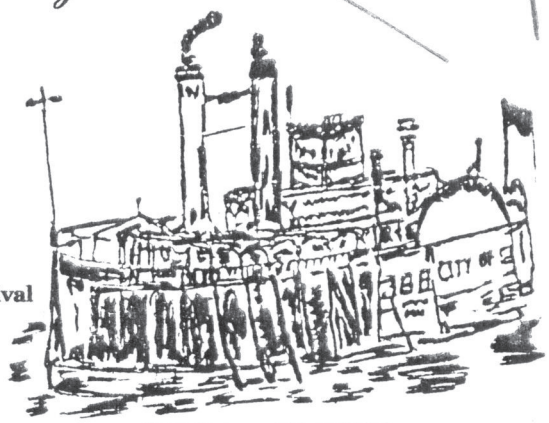

And on another one of the hottest days of summer, many of the Carver Lions participated in the Lions Golf Tournament in New Prague. Do you see a common thread? This has been a hot summer! No matter what the temperature is, whether hot or cold, the Carver Lions were out there, participating in volunteer efforts, raising money for life saving programs and having fun all the while.

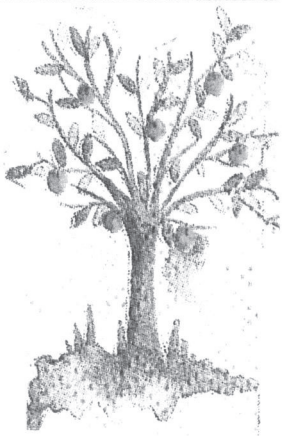

Next on the schedule is SteamBoat Days. Will it be hot? Please be sure to visit the Lions beer tent, have a cold one and say, "Hello". The Carver Lions are the biggest sponsor of SteamBoat Days. When you look into the sky at the Fireworks on Saturday night, know that all of this is brought to you by the Carver Lions.

Please be sure to come and join the Lions for a dinner meeting. They love new visitors! Even if you don't think you want to become a member, but are just curious about this wild and crazy bunch of good people, come and join them! They love guests and welcome you. They meet the again this September starting the first and third Wednesday of the month.
