Volume XXVIII
Number Two Hundred Sixty Nine
October / November 2010

Dedicated to Honor the Memory of Roman Riesgraf

St Nicholas Catholic Church

Father Thomas attended the council meeting to discuss the safety issue at the church entrance. The council was thanked for the flag erected but there are still some safety concerns due to some close calls. Request was made that an expert reviews the intersection. It was the mayor's opinion that a sign would help make the entry intersection safer, but that the street would be seeing improvements in the future and possibly the situation could be reassessed at that time.

Sheriff's Department

One of the candidates for the Sheriff talked with the council. The council discussed the facts of what was not working with the contract. Communications require updating was the candidate's opinion. Other questions were discussed with the candidate.

Water Recycling Ordinance

The council discussed the public information hearings data. The city planner reviewed the water recycling ordinance explaining that the in order to assist the city to meet water conservation goals, the city reviewed a proposal that car washes constructed after established dates be required to install measures ensuring that a portion of the water used be recycled by discharging into the sanitary sewer system. This proposal has no impact on personal individual car washing done on private property providing there is no fee.

Mills Properties representative commented on concerns regarding the initial cost, metering, complexity of controls, operational costs, customer perception and satisfaction, sludge and chemical removal, water and sewer usage, SAC/WAC fees and compliance testing. It was the representative's opinion was that if the car wash did recycle, reducing water and sewer use, then there should also be a reduction in SAC/WAC fees.

The city planner was questioned regarding the Metropolitan Council and the proposed ordinance. Question was asked if the proposed ordinance was modeled after other communities. The attorney and the city planner responded that the ordinance was. An estimated thirty to one hundred gallons per car are used in a car wash facility. The representative was of the opinion that the ordinance was inadequate. Motion was made to adopt the ordinance adding the section related to recycled water for car washes but was not carried after further discussion. Question was asked if there were any other facilities utilizing recycling equipment. Kwick Trips utilize the equipment and there is a list on-line. It was asked who monitors whether or not the car wash is meeting the sixty percent recycling. The city would be the responsible for the monitoring. Motion was made and carried to table the motion for further research.

East Union Elementary School

Too good to pass up and not help the East Union Elementary School! The first Tuesday of each month for the entire school year, between 4 PM and 8 PM, the Chaska McDonald's will donate 10 % (ten percent) of their earnings to the East Union Elementary School. So remember to dine at the Chaska McDonald's on Tuesdays. And be sure to say a 'HUGE" 'thank-you' to McDonald's for offering their generous support to the school!

City Engineer

The engineer was asked questions concerning the flooding on County Road #40. The engineer was asked about the contractor being on schedule for completion of the Interceptor Segment A project and the response given was that they were indeed on schedule. The engineer was also asked about the log jam on the river by the railroad trestle. The administrator stated that the rail road was expected arrive and push the logs through.

Mills Property Annexation

The council reviewed the resolution involving the property owned by Mills Properties. Approximately eighty eight acres located in Dahlgren Township is presently owned by Mills. They are proposing to develop a Fleet Farm store, car wash and a gas station. The city's Water Tower #2 is located on this property. Mills Fleet Farm has petitioned for annexation into the City of Carver and paid the required fees to the township.

City services would be extended to the parcel and the connection to municipal utilities required payment of the connection fees. A road is required to be constructed and the council authorized the engineering company to prepare a feasibility study. This road would be assessed one hundred percent to the benefitting property owners, although some assessments may be deferred depending on future annexation to the city. Development of the property also would require increase of services for maintenance of the municipal utilities, roads and storm water infrastructure, as well as policing services. Motion was made and carried with all ayes adopting the annexation resolution in accordance with Carver /Dahlgren Town joint agreement designating certain property located in the order annexation area of the township as in need of immediate orderly annexation.

The council discussed the ordinance regarding the Planning Commission and Orderly Annexation Agreement with Dahlgren Township. This agreement requires that the Town Board be given one seat on the Planning Commission. Proposed changes have been drafted to the ordinance to accomplish the requirement and to update other aspects of the ordinance. The staff recommended that the public informational hearing process be waived because the ordinance is inner-management related and has no direct impact on citizens, businesses or property owners. Motion was made and carried with all ayes adopting the ordinance amending section pertaining to the Planning Commission.

Taxation Reimbursement

The city planner reported to the council that the Water Tower #2 was constructed on property owned by Mills Fleet Farm currently situated in Dahlgren Township. At the time of construction the regulations of Carver County would not allow the property be subdivided. The property is stilled owned by Mills property but the city retains the easement.

Mills property owners have petitioned for annexation of their entire property and have already paid the taxation reimbursement fee to the township for the remainder of their property excluding the water tower. The city has been asked to pay the fee to the township for this portion of the annexation area as previously agreed. Motion was made and carried with all ayes authorizing payment for taxation reimbursement for the property containing the water tower to Dahlgren Township.

Carver Senior Citizens Luncheon

The Carver Lions send out the invitation for the Annual Senior Lunch sponsored by the Carver Lions. Social at 11:30 AM and Lunch to be served at Noon. Congratulations to everyone and for more results, go to the county's website and click on 'election results'.

Disclaimer

The "unapproved" minutes of the council and the township have been referenced for the purpose of creating this information for residents in the City of Carver and the townships surrounding the city.

Work Session

The council discussed the municipal utilities funds infrastructure history at a special work session. The engineer presented the history of the water treatment plant, the reasons the city had chosen its location and the need for another water treatment plant was discussed.

The financial planning consultant representative explained that their work has been with the city since 2002. The current water treatment plant was reviewed how the financing worked. The goal of a rate study was to ensure long term financial health of utility enterprise funds and provision of a financial plan for the expansion of the municipal utilities infrastructure as the city grows. The city presently views the benefits of the financial discipline over the past years. The water fund slowly increased until its level allows for maintenance and repairs of the existing water system.

Financial challenges continue for a growing population involving expansion of a water system. Many factors impact financial stress on the Water Connection Fund. There is doubt that this fund will be sufficient over the next decade plus to fund all the improvements necessary during this time. Therefore, prior to approval of any new major improvements or any major development necessitate improvements, it will require review of the financial feasibility of undertaking the project. The sanitary sewer operating fund has a good cash balance to allow the city to transition as part of the Metropolitan Council's regional sanitary sewer system.

At the work session the city discussed the fees involved in the Metropolitan Council's sanitary sewer system (MCES). Once this connection is achieved, the connection fee as charged presently will be reduced. Developers will pay both the city's connection fee and the MCES connection fee. The financial firm recommended that for 2011 rates that there be no increases in the sewer and water user rates, storm water charge, decrease the sewer connection fee said percent from the current rate per residential equivalency unit and increase the water connection charge. Suggestions was submitted that the council consider area charges, storm water area charges, explore temporary water treatment options at Well # 4 that possibly delay expansion of the water system until growth has caught up and in order to cover the improvement costs more development fees collected. Comment was submitted on the excellent recordkeeping done in order to draft the report. The administrator and the city planner were directed to research water conservation options for a future ordinance.

The council reviewed fee discussions from previous work sessions. The engineer reviewed different types of on-site ponding and regional ponding for storm sewer, the pros and cons of each type. Another engineer was also present at the meeting to answer questions regarding storm ponding. There was a discussion on the two types of ponding.

The administrator presented a 'Storm Water Credit Manual' sample for the council to look at. This storm water credit encouraged sound technical design practices to reduce the negative impact of development on a drainage system through a simple but effective credit system. The engineers suggested that the council consider offering such a credit.

The city planner reviewed sample comparisons of certain fees compared to neighboring cities for residential and commercial developments.

The municipal utilities supervisor reviewed the proposed 2011 municipal utilities budges with the council. A major sewer expenditure was discussed. The 6th Street Creek Crossing sewer line requires repairs due to corrosion occurring. Comment was made that the same repair is necessary below the Main Street bridge.

Happy Thanksgiving!

Bond Award

The council was informed about the bond award, refunding and capital equipment certificate ordinance. The financial consultant's representative told the council that the Standard and Poor's Rating Services has raised their rating to "AA' from "A+" on Carver's outstanding General Obligation debt based on the city's strong reserves and good financial management. The Standard and Poor's also assigned its "AA" long term rating to the City's Series 2010 A General Obligation bonds. The financial firm was thanks for their financial assistance to the city. The council was told about the bids received and low bidders. Motion was made and carried with all ayes adopting the resolution providing for the issuance and sale of General Obligation Bonds, Series 2010 A pledging for the security thereof net revenues, special assessments and levying a tax for the payment.

Public Hearing and Information Hearing Policy

Minnesota State Statute requires municipalities to hold public hearings on different types of actions associated with land use decisions. The city is not required to hold a public hearing for adoption of an ordinance or an amendment to an existing ordinance. However, the city drafted a policy to make it a city practice to hold "Public Information Hearings" when considering the adoption or amendment of an existing ordinance. The purpose of the hearing would be to promote active participation and awareness between residents and the city during the city's legislative process. The policy does have criteria enabling the city to waive the information hearing requirements under certain circumstances. Motion was made and carried with all ayes adopting the public hearing and information hearing policy.

City Services

The city administrator reviewed proposals for sanitation services for the city parks and facilities. Request was made to one sanitation service to revise their proposal to include any fees and taxes associated with providing services. A formal agreement was also asked for outlining the service demands of the city. The company found it acceptable. Motion was made and carried with all ayes entering into the sanitation services agreement with Waste Management for city owned properties.

Carver Village Christmas

Santa is coming again to the Village Hall. His expected arrival is 12:15 PM. This event is sponsored by the Carver Lion's and the Carver Fire Department. Each year, the event grows bigger and bigger, right along with all the fun!!!! This year there will be holiday craft projects. Sweet treats, coloring contest, raffle drawing and photos with Santa! Remember to bring along non-perishable item for the food shelf please!!!

RiverSide Park

The Park and Recreation Board members were told by the supervisor that the Solar Lighting Project was moving forward. A more suitable lighting fixture had been located. A concrete base with removable pole was the choice so that the fixtures could be easily removed when flooding occurs. The park Dedication Fee Study updates were also reported.

Trail Maintenance Program

The Public Works Director was invited to the Park and Recreation Board Meeting to discuss a trail maintenance program who was unable to attend. The board discussed a trail maintenance program agreeing that creating a trail evaluation form for each year was perhaps the best option for monitoring the quality of the trails.

Park and Recreation Board

A request had been made from some residents that board members e-mail addresses be posted in the city's website. As a volunteer group the members were not in favor of that type of communications preferring that any issues relating to the Park and Recreation Board continue to be directed through the staff.

Council Meetings

The city council adopted the resolution declaring the necessity for the council to meet in special session on the third Monday of each month. However, if the date occurs on a holiday, the meeting will follow the next business day. The resolution also authorizes the mayor and the administrator to cancel a special session when there is no business to conduct.

Citizen Input

A citizen attended the Parks and Recreation Board meeting and presented the council with a copy of her speech she had shared at that meeting. Compliment was given for the "Council Corner" on the city's website, along with the summaries on the website for citizens and the "on demand" link. The e-mail addresses of board members and council was also requested. The citizen opposed any additional parking lots in the Community Park. The baseball history in the City of Carver is appreciated, however more diversity in the city parks should be followed was suggested and encouraged.

Community Calendar November 2010
